

## EUROPE AN ARMED CAMP SAYS MILLER

German Cordial, France is Hostile to American Tourists, Finds

"Europe is an armed camp. Jealousy and fear predominate among the nations. They do not want to pay their war debts and frankly say we should cancel the obligations because they think we are a nation of millionaires." These were among the observations of Frank J. Miller of Albany, former member of the public service commission, who toured Europe last year. He spoke yesterday before the Salem Rotary club.

Miller found the Germans extremely cordial to the Americans. They were anxious to gain our goodwill. He noted great development in that country: new bridges, farm improvements, fine civic centers, auditoriums, stadiums, etc. The government is "busted," he declared, but the people seemed as well off as in any other country.

Miller was severely critical of the French. The customs officers were extremely rude. The people are irritated at the Americans and do not show the hospitality which other nations do.

Most interesting were Miller's descriptions of his trip into the northland. He went on an excursion boat which sailed within 537 miles of the north pole, clear into the pack ice of the Arctic ocean. For eight days the sun did not set, so far north were they.

He described Spitzbergen, a group of islands, Kinga Bay, Advent Bay, the base for numerous polar expeditions. The country is barren, without resources, and unpopulated.

## Program for Nut Growers To be Friday

DALLAS, Jan. 27.—A program of special interest to every person either growing walnuts and filberts or intending to begin growing them has been arranged for Friday of this week. There will be two meetings, one at the Dallas courthouse at 9:30 Friday, January 29, and the other at the West Salem Community hall at 1:30 of the same day.

Dr. Paul Miller and C. E. Schuster, special investigators of nut production and disease control for the U. S. Department of Agriculture, will be the speakers. Walnut blight control, selection of proper soil for planting, and the propagation of nuts will be some of the points discussed.
