

DAIRY CONFAB OPENS FEB. 9

Topics Include Lower Costs, Coop Markets and Greater Usage

Members of Oregon's dairy industry from producers to manufacturers will meet in two annual conventions early in February at which the present "state of the nation" as far as dairying is concerned, will be thoroughly considered.

Soon after the close of this meeting the annual combined convention and short course of the Oregon Butter and Ice Cream Makers' association will be held at Clatskanie February 9 and 10 for the 39th annual meeting of the Oregon Dairymen's association.

The Dairymen's association program is built around three main themes, announces P. M. Brandt, secretary of the group and head of dairy husbandry at the state college.

"Reducing Production Costs," is the theme of the forenoon session on the second day. Subjects will deal with cost of milk production, breeding up the cow, and better pastures and forage.

Following this, the afternoon will be devoted to "Cooperative Marketing," when speakers will present such phases as the Dairy Cooperative Association; the Interstate Associated Creameries; and development among other cooperatives.

An opening feature of the convention will be an address by Marshall Dana of Portland on "Oregon's Future Dairy Industry," while at the annual banquet that night addresses will be given by Max Gehlbach, director of the department of agriculture, explaining the relation of his department to dairying, and by Dr. W. A. Schoenfeld, director of the Oregon State college experiment station, on "The World, National and Regional Dairy Situation."

Professor Hyslop will speak on the problems to be confronted in raising and drying corn suitable for market.

Many persons in this section who are interested in the problem are of the opinion that corn raised in the Willamette valley is equal in quality as that raised in the famous corn-growing sections of the middle west. Hyslop comes Friday through arrangements made by Eugene Courtney, of the Bank of Woodburn.

Wine Color Velvet — At her coming out in Miss Elizabeth Haines wore a frock of wine colored velvet trimmed with ermine. Her corsage bouquet was of orchids.

EGG PRICES LOWERED IN SOUTH WHEAT BULLS, BEARS GET DRAW

Few Sales of Onions At \$4 Reported at Valley Points

PORTLAND, Jan. 28.—(AP)—Further price loss in California for eggs suggests that the supply is still above current demand in practically all parts of the country. Low record values are reflected in all sections but an end of the immediate downfall appears in sight.

During the last four years or so, the early forcing of the storage egg input season during February by the local co-ops has been of considerable aid in maintaining values here. There appears every reason to believe that the organization will again start operations early this season.

Trading in the butter market was fully steady for the day with no change in values on the open market. Make is just about holding its own in the local territory.

Late sales of onions at Willamette valley primary points include several carloads at \$4 to go to Texas. Aside from these practically no business is reported in the country as sellers are demanding the top.

Owing to adverse weather conditions, shipments of winter broccolli out of the Roseburg section have been practically suspended. Cauliflower offerings here are scant but a carload is due from Santa Maria Friday.

General easiness is reflected in the market for country killed hogs with most sales at the extreme low mark. Lamb demand is excellent with top prices realized. Veals are considered steady. Bulls in good call.

General Markets section listing various market prices for commodities like wheat, corn, and livestock.

Portland Grain section listing prices for various types of grain such as wheat, barley, and oats.

Portland Livestock section listing prices for various types of livestock including hogs, sheep, and calves.

Portland Produce section listing prices for various types of produce like butter, eggs, and fruits.

Fruits, Vegetables section listing prices for various types of fruits and vegetables.

Salem Markets

Table listing market prices for various commodities in Salem, including milk, butter, and various types of produce.

CABBAGE REMAINS CHIEF ATTRACTION

PORTLAND, Jan. 28.—(AP)—Cabbage continues the chief interest on the east side farmers' wholesale market.

Practically no really worth while cauliflower is offering, with "junk" at a wide spread.

Apple market continues with an overload of packed stock with prices held low.

Hothouse rhubarb is easier with choice stock a trifle lower. Potatoes show a spasmodic movement with prices fluctuating.

All root vegetables continued the previous good demand and at late prices.

Crop Damage Outlook Offset by Slump Of Securities

CHICAGO, Jan. 28.—(AP)—Zigzag action of grain values today ended in a draw. Both buyers and sellers were thwarted from any material progress.

Possibilities of a crop reduction resulting from a cold wave tomorrow or next day in domestic winter wheat territory gave an advantage at times to wheat bulls, but this influence was largely counterbalanced by relative weakness of securities.

Wheat closed irregular at 1/4 decline to 3-8 advance, corn unchanged to 3-8 lower, oats unchanged to 1-8 off.

Today's closing quotations: Wheat: Mar., 55 3-8 to 1-2; May, 57 7-8 to 53; July, 53 3/4; Sept., 59 7-8.

Corn: Mar., 37 7-8; May, 40 1-4 to 3-8; July, 42; Sept., 43 1-4.

Oats: Mar., 27 5-8 to 3-4; May, 26 5-8; July, 26.

STRAWBERRY CROP TO SHOW INCREASE

Estimated Acreage 11,120 For Coming Year With Washington Lower

Oregon's commercial strawberry crop will be 1190 acres greater than in 1931, according to figures compiled by the federal bureau of agricultural economics.

The 1932 acreage in this state is estimated at 11,120, compared to 9,930 last year.

Over the entire country, the estimate now indicates a 23 per cent increase in acreage. The late producing states, in which class Oregon falls, will increase acreage 13 per cent, but the 41 per cent increase in the second early group of states boosts the country's average.

For all the states, the preliminary figure for this year gives 190,540 acres. While Oregon's estimated production for 1932 is the highest in five years, the estimate for the nation is lower than in both 1928 and 1929, when the production was 207,280 and 203,360 acres. Oregon produced 10,000 and 10,500 acres in these two years.

Speaking of the Oregon production last year, the statisticians say: "Dry weather in the fall of 1931, with excessive rainfall late in March and during the picking season, together with severe late spring frost damage in most districts, made up a combination of unfavorable conditions that can hardly be expected to develop again this season."

"The 1931 commercial crop proved to be somewhat larger than harvest time estimates indicated." The cold pack disposal included approximately 15,281,600 pounds of fruit, or 47,765 50-gallon barrels, based on 30-pound cases. 158,335 cases of 4,769,000 pounds were canned. Fifty-seven cars, at 720 crates, were shipped from this state, survey showed.

Washington estimates show a slight reduction over the output last year.

HATCH GETS JOB FALLS CITY, Jan. 28.—Willard Hatch has secured the position of instructor in music and regular eighth grade work in the Chehalis, Wash., school. Mr. Hatch was selected from a number of applicants.

CONTRACT BRIDGE "The Official System"

Adopted by Leading Authorities By E. F. SHEPARD

An important feature of the game is knowing the relative values of games and penalties; when to overbid to save game, or when scoring penalties will pay better than going game or rubber.

Contracting went: Z, 2-Hearts; A, 2-Spades; Y, 3-Clubs (to show his strong side suit before supporting hearts); B, 3-Spades; Z, 4-Clubs; A, 4-Diamonds (trump); Y, 4-Hearts B, Pass; Z, 4-Spades (a bid of opponent's suit shows lack of losers in the suit); A, 5-Diamonds; Y, 6-Diamonds (no slam, 6-Spades; Z, 7-Hearts; A, 7-Spades; Y, Double, ending contract); The contract was defeated five tricks, costing A-B 900 points net. But the grand slam for Y-Z would have yielded 15000 points, plus 100 honor points, 210 game points, and 700 love rubber points; a total of 15910 points, or 1610 points more than accrued from doubling A-B. The latter pair won game on the next deal, saving them 120 game points and 200 points off opponents, rubber bonus, 1200 points (trump) giving up on the previous hand. When Y-Z won three-odd at No-Trumps on the next hand they were still short 1326 points of what the slam rubber would have yielded.

SELLING OF RAILS UNSETTLES MART NEW YORK, Jan. 28.—(AP)—Stocks sea-sawed uncertainly today, trying to make the best of inconclusive news.

Late selling of the rails unsettled the general list which had been steady after a dull sag around the noon hour. Trading in the forenoon proceeded at the slowest pace of the past several months, but activity then picked up and sales for the day amounted to 1,115,990 shares.

Not losses were moderate, averaging just under a point for the 90 issues used in the averages. Some rails, notably New York Central, Union Pacific, Santa Fe and Southern Pacific, were down

RED BERRY MITE LESSON SUBJECT

WOODBURN, Jan. 28.—The next meeting of berry growers, to be held at Woodburn high school will concern the one problem of controlling the red berry mite in evergreen blackberries. Last season it has been estimated that about one third of the evergreen crop was ruined by this disease.

The series of meetings, which deals with problems of interest to local berry growers, is being sponsored by the Woodburn department of vocational agriculture. Ronald E. Burnett, Donald Hughes, instructor at the school, is leader.

At the last meeting the time was devoted to a discussion of training loganberries, and the best methods for doing this. The conclusions arrived at were that loganberry canes should be pruned back to five to eight feet with eight to ten canes to a strong hill and less on the weaker ones. This will leave a total of 50 to 80 feet of canes per hill, which is more than the average grower has been pruning. Severe pruning is more necessary on soils low in fertility or moisture holding capacity than on the better soils.

Growers who tried this system last year stated that larger berries were produced with no apparent reduction in yields. In view of the unfavorable market outlook at present it was felt that any practice that would tend to improve the quality of fruit would be of particular value.

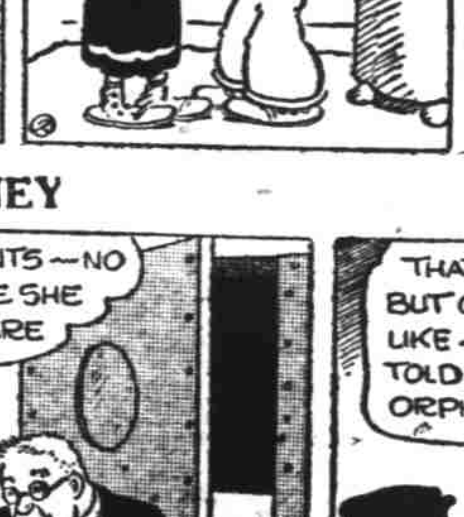

TURKEY DINNER EVENT ORCHARD HEIGHTS — Mr. and Mrs. Charles S. Matthews were hosts to a group of friends Wednesday, the occasion being Mrs. Matthews' birthday. A turkey dinner was served to Mr. and Mrs. L. E. Reed, Donald Reed, Mrs. Marie Southwick, Milton Southwick, Mr. and Mrs. Wm. Cox, Barbara and Virginia Cox, all of Orchard Heights, Ellis Wyland of Oregon City, and Mr. and Mrs. Matthews.

a point or more. American Telephone was still heavy, off 2 1/2 at the start and 1 1/2 net. Auburn sagged 4.
