What are your chances of baking success?

Greater... with Calumet.. because it acts twice!

WHEN you bake with Calumet, the Double-Acting Baking Powder, you can feel sure that your cakes and quick breads will be perfect every time.

For Calumet acts twice, not once. Its first action—in the mixing bowl—starts the leavening. Its second action—in the oven—lifts the batter high and light—even though you may not be able to regulate your oven temperature accurately. Bake a cake or some quick bread. See why Calumet has become the most popular baking powder in the world.

Only One Level Teaspoon of Calumet to a Cup of Sifted Flour!

That's the usual Calumet proportion. Be sure to follow it even though you may have been using nearly twice as much with other baking powders. You'll be delighted with this economy! And more than delighted with the results Calumet gives you. Perfect texture! Perfect flavor!

All baking powders are required by law to be made of pure, wholesome ingredients. But not all are alike in their action nor in the amount that should be used. And not all will give you equally fine results in your baking. Calumet is scientifically made of exactly the right ingredients, in exactly the right proportions to produce perfect leavening action—Double-Action. Get a can of Calumet from your grocer today. Notice Calumet comes in full-sized 16 ounce cans.
