

MAKE THIS TEST—See for yourself how Calumet Baking Powder acts twice to make your baking better. Put two level teaspoons of Calumet into a glass, add two teaspoons of water, stir rapidly five times and remove the spoon. The tiny, fine bubbles will rise slowly, half filling the glass. This is Calumet's first action—the action that Calumet specially provides to take place in your mixing bowl.

After the mixture has entirely stopped rising, stand the glass in a pan of hot water on the stove. In a moment, a second rising will start and continue until the mixture reaches the top of the glass. This is Calumet's second action—the action that Calumet holds in reserve to take place in your oven. Make this test today. See Calumet's Double-Action which protects your baking from failure.

It's wonderful what Calumet's **DOUBLE-ACTION** does for cakes and biscuits

YOU can feel sure your biscuits and cakes will be perfect when you use Calumet Baking Powder, for it has double-action. Two leavening actions that protect your baking from failure and make it light, fluffy, fine-textured.

Calumet's first action, in the mixing bowl, gets the leavening properly started. Then, in the oven, the second action swells through the batter and holds it high and light—even though you may not be able to regulate your oven temperature perfectly. Bake a Calumet cake, some muffins or quick bread. See why it is the largest-selling baking powder in the world to-day.

Only One Level Teaspoon of Calumet to a Cup of Sifted Flour!

That's the usual Calumet proportion. Be sure to follow it even though you may have been using nearly twice as much with other baking powders. You'll be delighted with this economy! And more

than delighted with the results Calumet gives you. Perfect texture! Perfect flavor!

All baking powders are required by law to be made of pure, wholesome ingredients. But not all are alike in their action nor in the amount that should be used. And not all will give you equally fine results in your baking. Calumet is scientifically made of exactly the right ingredients, in exactly the right proportions to produce perfect leavening action—Double-Action. Get a can of Calumet from your grocer to-day. Notice Calumet comes in full-sized 16 ounce cans.
