NEW SHREDDED BISCUIT TOASTED ON BOTH SIDES

Extra Crispness Just One of Many Improvements Developed for Kellogg's WHOLE WHEAT Biscuit

In line with its policy of constant improvement, the Kellogg Company some time ago introduced a new shredded whole wheat biscuit which offers several outstanding improve-ments in this type of cereal. The new Kellogg biscuit is "pres-sure-cooked" by a special process that retains the full food value of the whole wheat. At the same time it produces a delicious mellow fla-vor and makes the biscuit very easy

The biscuits are also much crisper and crunchier, for they are toasted on both top and bottom—not just one side. Incidentally they are also a new, convenient size to fit the coreal bowl without crumbling. And you get 15 to the package instead of the usual dozen.

As evidence of the high food value of the Kellogg biscuit, the Medical Arts Laboratory of Philadelphia made a careful analysis and certify every package.
