## PHILA. LABORATORY **CERTIFIES NEW** SHREDDED BISCUIT

Kellogg's WHOLE WHEAT Biscuits Pronounced Very Rich in Food Value

One of the reasons for the popularity of the new Kellogg's WHOLE WHEAT Biscuits is the food value of this tasty ready-to-eat cereal. The improved Kellogg's biscuit is "pressure-cooked" by a special process that bakes in delicious flavor and retains all the food elements of the whole wheat. As a result, the Medical Arts Laboratory of Philadelphia, after careful analsis, now certifies every package

for food value. The new Kellogg biscuit also offers several other distinct imbeen a guest in Portland since provements. The biscuits are a more convenient, economical size. Two just fit the cereal bowl-and you get 15 to the package instead of the usual dozen.

And every biscuit is toasted a golden, rich brown on both top and bottom - not just one side. This makes it crisper and tastier than ever before. Also, "pressure-cooking" and "double toasting" make Kellogg's WHOLE WHEAT Biscuits easier to digest.

The new Kellogg's biscuit is delicious with hot or cold milk or cream; extra appetizing with the addition of fruits or honey. Local grocers are featuring this improved ready-to-eat cereal. It may be iden-tified by the name, Kellogg's, and the familiar red-and-green package. Made by Kellogg in Battle Creek.
