DETECTIVE GETS HIS MAN

EDWARD "FATS" MCCARTHY. MRS. JEAN MCCARTHY.

SCENE OF MCCARTHY GUN BATTLE.

In sharp contrast to the career of "Fats" McCarthy, New York gang leader who came to the inevitable end of a life of crime when he died with a police bullet in his heart at Albany, N. Y., is that of the young police hero who tracked him down and killed him in a pistol duel to the death. Detective Harry Moore, although only on the police force since 1924, has already been shot on three occasions while rounding up bad men. But each time he succeeded in capturing the man who shot him. When he stopped the first gang bullet, back in 1924, he was carried into the French Hospital, New York, more dead than alive. But Cupid pulled him back from the brink of the grave. He fell in love with his nurse, Helen Morgan, with the result that she is now Mrs. Moore. The young sleuth was assigned the task of bringing in McCarthy after the gangster had slain Detective Guido Passagno, last October. McCarthy was also under suspicion for the Harlem baby massacre last Summer. Moore stuck tenaciously to the trail of the gang leader, who boasted he was "too smart to be taken by a dumb cop," for ten months until he cornered him at Albany. In the ensuing gun battle Moore was wounded three times, but he succeeded in planting a bullet in McCarthy's heart. Mrs. Jean McCarthy, the badman's wife, was wounded in the fight and she and several of the trapped gang surrendered and were taken in custody.

Three Broods Chix Raised by Bantam With Pullet's Aid

NORTH HOWELL, July 19.—Some hens have their hands full with one brood of little ones, but on the Virgil Morgan farm here a bantam hen is successfully raising three broods of chicks!

A pullet of the first hatch mothered the second hatch of eight little ones, and the mother went right on and layed eight more eggs, which hatched a hundred per cent.

Morgan says it was interesting and unusual to see a half-grown pullet mothering eight smaller ones, and that the incident seemed to exemplify helpfulness to the highest degree.
