"EARHART HOP" RYTHMIC TRIBUTE TO LADY LINDY

If you decide to learn the latest dance and join the merry throng that is doing the "Earhart Hop," the chances are that when you become competent in the movements of the dance you'll be able to go right out and stunt in an airplane. For the new ballroom craze, created as a rythmic tribute to Amelia Earhart's trans-Atlantic achievement, teaches all the tricks of aviation from the take-off to the happy landing. "Contact" is the position taken by the dancers at the beginning of the "Earhart Hop." From there you go into the "Take-off" and thence into a nice climb for altitude. Then, when you're up in the blue, with arms and legs doing duty for wings and propeller, you go through all the convolutions of an airplane—left banks, barrel rells, wing dips, zooms and spirals, until the music reaches the grand finale and you zoom down in a power dive to a perfect three-point landing. Above are some of the positions in the dance. Try it over, for if you are a dancer you won't be in style if you can't do what debb ies and dowagers, collegians and grandpas, gigoles and sugar daddies are doing—the "Earhart Hop."
