C. E. Sawtelle is one Polk county farmer that is doing his irrigating easily and cheaply. Mr. Sawtelle's place is located just east of the Wallace bridge over on the north side of the county. He is developing gravity flow for irrigation from three small creeks on his place.

Besides irrigating a garden Mr. Sawtelle has about an acre and a half of Ladino clover which is now in its second year. There is Clarke county, Wash., about Sept. a dense stand of vigorous green | 16 to 20. Fruit on the trees is of feed growing and as a result of high quality following a favorable irrigation. Extras now 20 Cents Peach Prices are Lowest Ever

PORTLAND, Aug. 25-(AP)-The advance of 1c all around in the egg market as announced by Manager Dixon of the Pacific Co-op is now in effect here and is being maintained. The new price

on extras is 20c dosen. Advance of 1e pound in the price of cheese effective at once is announced by the Tillamook association. The new price in Portland will be 15c for triplets and

18c for loaf. Market for chickens maintains generally steady to strong tone. Active demand is shown all through the list with a scramble for all except the heavy sorts. In spots even these are eagerly sought.

Peach prices here have reached the lowest mark known with sales of Yakima fancy Elbertas 35@ 40e and Oregon (Willamette valley) Crawfords 30@35c box. Quality in general is very good. More rapid movement of Dil-

lard cantaloupes is confirmed here. Extreme quality is finding favor generally at \$1.10 crate for standards. Other cantaloupes are First Muir peaches of the season are appearing in the local

trade and already there are ad-

vance orders for supplies. The season is said to be earlier than usual and will close quicker. Local potatoes continue to dominate the local market despite the offerings of Yakimas at even lower values. Extreme quality of the home product this season is given

as the reason.

CORVALLIS, Ore., Aug. 25-(AP)-Nearly complete cleanup of the old dried prune crop together with prospects of good quality crop this year have helped bring a more hopeful attitude among northwest prune growers, it is stated in today's review of the market situation by the U. S. D. A. bureau of agricultural eco-

C. experiment station. Not more than 5 per cent of the 1931 crop remains to be sold, and at the present rate of movement it will be entirely cleaned up in a few days. Prices are not satisfactory but they have afforded an opportunity to clear the decks for the new crop.

Strenuous efforts are being

made in California to sign up 85

per cent of the growers in an

nomics cooperating with the O. S.

agreement to pool the present large crop there. The campaign is closed but final tabulations have not yet been announced. In the northwest the crop is estimated at 35,000,000 pounds subject to change with weather conditions from now until harvest time, which will commence in
