

WATER REPORT IS OKED BY COUNCIL

WEST SALEM, Sept. 8.—At the council meeting Tuesday night, complaints were entered against dogs running at large, and the matter referred to the police committee.

The complete financial report for the three years' time on the water system, ordered at the last council meeting, was given and accepted. Mr. La Due reported some trees along the streets and sidewalks needed trimming and this was referred to the street committee. He also reported the two sewer outlets into the river had been repaired.

Major Charles A. Robertson asked that two drinking fountains be installed at the entrance to Kingwood avenue on Edgewater street, he to finance one and the city the other. Because of the expense, it was decided to postpone that until the first of the year. It was decided to put \$5 into a sign advertising the national convention of the American Legion to be held in Portland next week, the sign to be placed across the highway.

Earle Hendrick and Robert Hall of Kingwood terrace requested that a light be installed on Cascade drive near their homes, and it was agreed to place the light there was a suitable pole there. The street committee reported illegal signs had been removed from the streets.

PUBLICITY!

South Trimble, Democratic clerk of the House of Representatives, who is regarded by many as having defied the President, the Senate and all the directors of the Reconstruction Finance Corporation, Trimble made public the R. Lone Grocer Aids Farmer By Exchange

MONMOUTH, Sept. 7.—C. C. Muirkey, Monmouth grocer, has been trying out a plan of exchange this season which he says has netted excellent results. He began it this spring by buying all fruits and vegetables exclusively from local producers, except in the few cases that local growers could not furnish him enough to supply his customers.

He gave staple groceries in exchange, and made no special effort to carry watermelons and other like until the local season provided them.

He also bought wood from farmers having that commodity, paying them in staple groceries, and trading the wood for more fruits and vegetables.

By this plan he asserts that a lot more profit has been kept in the home community, many more home people have been comfortably supplied with a wide variety of food stuffs, and he has been enabled to make a much faster turnover of goods. He intends to continue and enlarge the program.
