Mrs. Mary Johnson To Entertain Mothers

Mrs. Mary Johnson will entertain Tuesday afternoon at the new home of the Alpha Phi Alpha sorority, 766 North Summer street, complementing the Alpha Phi Alpha Mothers club.

Special guests are being invited and include mothers from out of town, sorority pledges, resident members, alumnae, and patronesses who are also included in the Mothers club.

Program numbers with which to enhance the enjoyment of the afternoon hours in the lovely new home will be given by Miss Ruth Schreiber, Miss Harriet Adams and Miss Bonetina Edwards, who will present musical numbers, and Miss Lulu Allen, who will give a group of readings.

At the tea hour Mrs. Johnson will be assisted in serving by a group of alumnae members.

This meeting is also the annual election of officers for the club.

The General Aid society of the Methodist church is busy these days with plans for the all-day bazaar which will be an event in the church on December 9. Mrs. W. C. Young is president of the society. A luncheon is to be served at noon and the committee in charge includes Mrs. Herbert Ostlund, Mrs. Morrill Travis and Miss Elsie Miller. The evening dinner will be in charge of Mrs. E. A. Legge. Each circle is contributing for a booth space for this interesting bazaar.

The Hale home was the scene of an enjoyable gathering Thanksgiving day. At the dinner covers were placed for Mrs. Nettie Schram, Mrs. Naomi Long, Mr. and Mrs. J. K. Neal of Buena Vista, Mr. and Mrs. George McLaughlin of Independence, Mrs. Almitra Hale, the Misses Laura and May Hale. The table decorations included chrysanthemums and English violets from the McLaughlin gardens.

Mrs. Elizabeth Sherwood accompanied by Joan Donaldson and Margaret and Jimmy Sehon left early Thursday morning for Mill City to be Thanksgiving day guests of Mr. and Mrs. Harry Mason and Virginia and Isabel Mason. They plan to return to Salem Sunday.

Mrs. Marie Flint McCall had as Thanksgiving dinner guests, Mr. N. N. Cuck, Dr. W. B. Morse, Mr. and Mrs. A. E. Epiay and son Billy, Mr. and Mrs. C. L. Blodgett, Corydon Blodgett, Mr. and Mrs. Ralph Allen and Betty Zoe, Miss Ann Porter and George Baker.

Mrs. Hatlie Given entertained with dinner Thanksgiving day in compliment to Mr. and Mrs. Fred Prince and Harry Given.

Twenty members and guests of the First Methodist Piereans enjoyed a dinner Friday night at the

Roses Should be in Every Garden; Time to Plant is Here; Problems Discussed

Roses are not as popular as they should be and part of the trouble is that the better varieties are not generally grown and they are thought to be too much trouble. They are so exquisitely beautiful and have such a long season of bloom that they should be in every garden.

First, we must select some of the best varieties. If you are not acquainted with roses yourself, then get the advice of a rose grower or send to the International Test Garden at Portland, Oregon, where this information can be obtained. It is almost impossible to select a rose from the description in an ordinary rose catalog as all the descriptions are so rony. There are a few of the better firms who publish fine catalogs and they tell the truth about each rose. There are too few of these catalogs, however. Do not buy the so-called one year old bushes on their own roots, as they are merely little rooted slips and all rose experts agree that the two year old budded rose bush is the best, even though they cost a little more.

This is the time of the year to plant rose bushes—from November 15 to February 1, is all right, but during November is better as they make quite a few new roots during the winter.

As to the varieties: The writer has grown roses for seven years and has tried about one hundred varieties and recommends only those that are the best. By a good rose is meant that they bloom well, are resistant to disease, are beautiful, have good foliage and strong growth. To begin with, the yellow roses are first as many people prefer a yellow rose.

Angeles Fernet is one of the finest coppery yellows with large glossy foliage and blooms are most beautiful in spring and fall.

Feu Joseph Loomans is a golden yellow and also has glossy foliage and a very tapering bud. This one blooms best during the warm summer and its color is richest then.

Julien Potin is a lemon yellow of perfect form and is best in spring and fall. This one won a prize at the International Test Garden at Portland and at many rose shows this year.

Other good yellows are Norman Lambert, Lady Hillingdon, Golden Emblem, Duchess of Wellington, Florence Izard, Independence Day, Johann Hill, Lady Margaret Stewart, Mrs. G. A. Van Rossem, and Mrs. Dunlop Best.

Pink roses are plentiful and not so popular but are well worth growing, especially these varieties:

Mrs. A. R. Barraclough is a bright water pink with a very vigorous growth and large perfectly shaped blooms. One of the newer ones and best in summer.

Madam Edouard Herriot is a home of the Misses Mildred and Maud Simons. Chrysanthemums and Jerusalem cherry adorned the rooms. Games and conversation occupied the evening.

reddish coral when first open and fades to coral pink and is lovely even after fading. It is a very free bloomer and is better in spring and fall. It is also called the "Daily Mail" as it won a \$1000.00 prize offered by the Daily Mail of England, when first introduced in France.

Imperial Potentate is a bright pink, strong grower, very sweetly scented and a good cut flower. Best in spring and fall.

Los Angeles is a salmon pink and is one of the finest in shape and color and it blooms best in the warm weather. But it budded on Japanese multiflora understock, if possible, as it does very well on it. This rose does not grow well for everyone but it is well worth trying.

Other worth while pinks are Shot Silk, Padre, Margaret McGreeby and Betty Uprichard.

Red roses are also popular and they are usually very sweetly scented.

Etolle de Holland stands at the top of the list in reds. It is everything that a good red rose should be and does not turn blue with age. Its blooms are good all season, although the color is deeper in spring and fall.

Hortulanus Budde is a bright red and blooms best in spring and fall; its buds are long and tapering and it is a very free bloomer.

E. G. Hill is a new red and is a good summer bloomer. It is a full bloom and not such a good shape, but it lasts long in summer heat and does not turn blue.

Other good reds are Hadley, K. of K. Admiral Ward, General McArthur.

In the two toned roses the following are good:

Talisman is bright pink on one side of the petal and yellow on the other. It is a free bloomer and sweetly perfumed for so fancy a rose.

President Hoover is somewhat similar to Talisman and is good.

The Queen Alexandria is a two toned rose and is deeper and brighter than Talisman, especially Good Climbers are numerous: Those that bloom but once are Dr. W. Van Fleet, pink, Silver Moon, single white, Paul's Scarlet Climber, bright red, American pillar, single pink, Austrian Copper, copper red, Mary Wallace, pink.

The climbing hybrid tea roses bloom more or less all summer and fall. Some good ones are: Climbing Madam Edouard Herriot, Climbing Golden Emblem, Climbing Cecile Brunner, Ch. Les

Angeles and Mermaid, a single cream. Some of the newer roses that have been tested and found good by others are: Empress, Duchess of Athol, Gregoire Staechelein, Climber, Mrs. E. P. Thom, Autumn, Paul's Lemon Pillar, Roslyn and Olympia.

Now that we have chosen some of the best varieties, in good field ground two year budded stock, let us find a place where they have any soil that will grow a good vegetable garden will grow good roses, provided that they are planted right and are well fertilized. Dig the holes for the rose bushes about one foot to one and one half feet deep and two feet across. Set roses about two feet apart in a place where they have sunning at least half a day, and not near large trees. Good drainage is important. Use no fertilizer the first year after planting, as they will do much better in after years, if not forced to bloom heavily the first year.

Many people have the idea that after the roses finish the June blooming, they will not bloom again until fall. But if the blooms are cut with long stems or the withered bloom is cut off with a long stem as soon as it fades, the bush will put out new growth and soon there will be more blooms and if this is done all summer, they will bloom from May to November.

Roses are heavy feeders and must be fertilized after the first year. Barnyard fertilizer is best but is hard to get so bonemeal and dried sheep guano can be used. A double hand full of each two or three times a year is not too much.

As to bugs and diseases: there is a new preparation in the market called Pomo-Green, and it is all purpose dust for roses. If it is used faithfully every two weeks all spring and summer, the bushes will be kept free of aphids, worms, mildew and black spot. This can be used as a dust or a spray and is colored green so it will not discolor the foliage.

If you wish to go more deeply into rose culture, learn to bud them yourself and get a lot of thrills. A good understock is Japanese Multiflora. This is a wild rose in Japan and is used because it makes such a good root system. By budding your own, you will find that you get better bushes than you can buy, especially if you plant the understock where you want the rose bush to be. The English call these bushes "maiden" and they usually grow and bloom better than the bushes that are started in one place and then dug up and moved to another.

Grow half a dozen of the better varieties of roses and you will become a rose enthusiast. Do not begrudge the care you have to give them for where can you find a perennial, annual or shrub that

HOW DOES YOUR GARDEN GROW?

Little Madam

If your snapdragons, hollyhocks, perennials, phlox, delphiniums or peonies have been bothered by rust or blight during the past season, be sure to remove all old stalks and leaves and burn these. Be careful to pick up leaves from the ground. It might be as well to spray the crowns and ground about them with a Bordeaux mixture at this time of the year and again in the early spring. Placing ashes over the delphinium crowns is also a good idea.

While you are about this cleaning-up process, you may as well clean up all other garden refuse which might harbor slugs, bugs and other garden pests in general. Small garden pests bring on moles and mice make nice runways for mice. Slugs do considerable damage at this time of the year. During the damp weather they work beautifully.

Your irises will repay you in the spring for slaked lime worked into their beds this autumn.

When you have out of all of your chrysanthemum blooms or when the flowers are ruined on the stalks by weather conditions, it is a good idea to cut the stalks down to within a few inches of the ground. Healthier shoots from which to make cuttings will appear earlier in the spring.

If you are planning on forcing hyacinths for indoor bloom you should have them potted by the end of this month or very early in the next. When they are potted, sod the ground and then put them in the basement. When growth begins you can bring them out again.

To those of you who like to experiment with growing trees and shrubs from seeds, let me say I have just recently discovered a house in the east which carries all sorts of tree and shrub seeds. This is really a worthwhile and interesting experiment for those who have plenty of time and patience.

I hope you are all noticing how lovely the Firethorn is this autumn. I do not believe that I have ever seen it looking better. The other day I saw a tiny Firethorn at Salem not more than two feet tall, simply covered with the fruit.

will bloom six to seven months of the year?

MRS. MYRON VAN EATON.

which reminds me that a nurseryman told me not so long ago that it does not pay to purchase too large Firethorns. They are not apt to do as well if they are very large. It is much preferable to purchase the young plants and wait a year or two for interesting results. There are varieties AND varieties too, you know. It is well to investigate at this time of the year so that you get a variety that is worthwhile. Leland's Firethorn (Pyracantha Coccinea Islandi) is said to be one of the best. Leland's fruit is more profuse and of a brighter hue, I am told.

Most of the deciduous shrubs may be propagated by cuttings taken at this time of the year. They should be cut from mature wood of this past season's growth. You may tie them in bundles and bury them in sand for the winter. When spring arrives plant the cuttings in rows with the calloused end about three or four inches deep. You will find a large percentage of the cuttings will make nice shrubs.

It is difficult to grow rhododendrons from cuttings but they respond quite readily to layering. This is done by bending down the branches and covering them with solid earth at one spot. The bark should be lacerated or broken at this point to encourage the starting of roots.

Bits for Breakfast

(Continued from Page 4)

fore and after the first public schools were opened. It would be difficult if not impossible now to either give all of them, or to trace them chronologically.

C. M. Parmenter, the contractor, who was born in the house where he and Mrs. Parmenter now reside, at 809 North Commercial street, and who has lived there all his life, attended three of the pioneer private schools, though he missed the first one, in the building of which the First Congregational church was organized. He was born Sept. 13, 1859, and that was probably after school sessions had been discontinued in that house. He remembers well attending the school of Misses Pratt and Boise, the one of "Daddy" Butts, and the second one of E. J. Dawns and wife.

Ida M. Pratt started a primary school in 1869-70 in a school house that was made of the rebuilt barn of Dr. J. C. Shelton, who lived on the southeast corner of Division and Front streets. The barn was east of the house, on the alley. Miss Liane Boise, sister of Judge R. P. Boise, arrived from Massachusetts in that period, and

she proposed to join with Miss Pratt and teach the higher grades. Thus they had a two room school in the rebuilt barn, with about 50 pupils, whose parents paid \$4 a term for each child. These ladies afterward taught in the "Big Central" school, where small boys called "O's" West and "Charlie" McNary attended. Miss Pratt is now Mrs. Ida M. Babcock, living in her home at 749 North Commercial street, near the site of the old barn school house, and "O's" and "Charlie" often tell her that she gave them a good start in life. "O's" was afterward governor of Oregon, Governor West, 1911 to 1915. "Charlie" is Chas. L. McNary, senior United States senator from Oregon. Both had held other high positions before being elevated to the places named.

Family Reunion is Turkey Day Event With Zimmermans

MEHAMA, Nov. 26—A family reunion was held Thanksgiving day at the Waldo Zimmerman home above town. Those present were: Mr. and Mrs. Giles Wagner and family, Mr. and Mrs. Leo Wagner and family, Mr. and Mrs. Elmer Taylor and small daughter, Mr. and Mrs. Wally Byers, Mr. Hubert Wagner, and the host and hostess, Mr. and Mrs. Waldo Zimmerman.

Others entertaining that day were Mr. and Mrs. Floyd Monroe who gave a dinner in honor of Mrs. Monroe's sister, Mrs. Rillie Wilson. Those present were: Miss Jessie Mae, Miss Wava Wilson, Mr. Dale Monroe, Ercil and Russell Wilson, the honored guest, Mrs. Rillie Wilson and the host and hostess, Mr. and Mrs. Floyd Monroe.

Thanksgiving Sees Friends Gather at Homes About Zena

ZENA, Nov. 26—Mr. and Mrs. Walter B. Hunt entertained with a dinner at their rural home on Thursday, having as their guests Mr. and Mrs. Roy Stoutenberg and daughter Muriel, Mr. and Mrs. Raymond Palmer and children, Lola May and Leroy, Mrs. Carrie Penrose and Miss Rova Penrose, all of Unionvale; Mr. and Mrs. Theo Burns and daughters, Marian and Viola, and J. T. Hunt of West Salem, and Kenneth and Helen Hunt.

Mr. and Mrs. Wayne D. Henry had as their Thanksgiving guests Mr. and Mrs. W. W. Henry, Mr. and Mrs. W. Kenneth Henry and daughter Corinne and Charles Newman.

Mr. and Mrs. Robert Judson and children, Raymond, Joan and Janice and Mrs. I. Douglas of Salem were guests at the home of Mr. and Mrs. James A. French of Zena.

The United States produced 84.8 per cent of the world output of natural gasoline in 1931.

Fruitland School District to Vote On Special Levy

FRUITLAND, Nov. 26—Notices are posted asking voters in district 113 to meet at 8 p. m. December 1 to discuss the budget and vote on a special tax of \$100 asked by the school board.

An interesting program was given by the school and Parent-Teacher association November 23. Owing to the holidays the P. T. A. will not meet again until January.

The Missionary society met at the home of Mrs. K. O. Runner and finished a quilt and appointed committees for the bazaar to be held December 9. The next meeting is to be held at the home of Mrs. O. Fager November 29, at which time the presiding officer, Mr. Gates, will be present.
