While we hope to bring some outside talent, Warren Crabtree, local Smith-Hughes instructor said, in speaking of the meetings, "into the night classes, emphasis will be placed largely on cost of production from survey material supplied by the college and federal workers in agricultural economics. This work will vary from that in our three previous schools. Your personal problems will be welcomed for open discussion and all work will be approached from a most practical standpoint. I NEED \$300.00 By Wednesday Night Saturday I went to the bank to borrow some money and they gave me that "far away look". I don't blame them. I don't like to borrow money anyway. They have been very nice to me and I haven't bothered them very much during the last five years and if I started running up there every time I needed a little money and they let me have it the rest of you fellows might find it out and we would all be up there trying to borrow money instead of depositing it. 'Whew' what a bum lot of scales—

We quote a few lines from the Federal trade commission report on short weights—Purchases were made in 1691 stores located in four representative cities, after going into detail they sum it up by stating that your chances of getting short weight when buying bulk goods weighed in advance of sales is two out of three. While the Chains are offenders, the independents are not without spots as they're only a small percentage behind the chains in giving short weights. Of course its very likely a lot of the short weights were mistakes—be that as it may—the result is that some of you dont get what you're supposed to get for your money. Ask to see your purchases weighed. Stores giving full weight will appreciate it asking to see the weights.
