Bits for Breakfast

(Continued from Page 4)
"We left the river on the 10th of January, 1817, for the Sandwich Islands; our object was to refit the brig and cure pork. We were also to bring as many of the Sandwich Islanders to the Columbia river as we could conveniently accommodate. . . . At the Sandwich Islands we found a ship belonging to the king. The ship was an American, called the Albatross, sold by Captain Nathan Winship. . . . (The Albatross was a prominent ship on the northwest coast; was in the Columbia in 1810 when the Winship brothers attempted to establish a post at Oak Point. Wilson Price Hunt visited Astoria on the Albatross in 1813. Three of the crew of the Mercury, Captain George W. Ayers, had deserted, and were kept by Comcomley for 12 months, when they were taken away by the Albatross, probably in 1810.)"

On the 14th of April (1817), being complete in provisions, repairs, etc., we took on board 80 natives (being all we could conveniently accommodate), for the Columbia river. . . . and made all sail to the northward towards Norfolk sound (Sitka).
Seventh Visit to the Columbia
"We had variable winds and bad weather all the passage to the river, where we lay to length arrived, June 12, 1817, and came to under the fort in our old berth, sent the Islanders on shore, and commenced loading our cargo."
(Concluded on Tuesday.)

home. Mrs. Walter Cline assisted in serving at the tea hour.

Mrs. Gordon Thompson was hostess to members of her club at her home Thursday afternoon. Mrs. Martin Roth will entertain the group in a fortnight.

Daily Health Talks

By ROYAL S. COPELAND, M. D.

While every effort was made to determine what food he was sensitive to, no relief was found. The sufferer neglected to tell his physician that he always took a headache tablet to relieve his headache. When that particular headache tablet was discarded the lives disappeared, but I do not know whether he still suffers from headache.

"URTICARIA" is another name for "hives," or "nettle rash." It is a burning and annoying condition. Urticaria is characterized by the sudden appearance on the skin of a firm, whitish patch. This is surrounded by a reddish area. The disturbance resembles the swelling caused by a mosquito bite.

The swellings may cover the entire body. They cause itching or a stinging sensation. The rash may last from a few hours to a few days.

I receive many letters requesting information about this annoying condition and advice as to its treatment. Cure can be obtained by finding and removing the cause. There are many causes. To find them requires careful investigation and study.

Sufferers from urticaria are sensitive to certain substances. The rash is caused or aggravated by certain foods, drugs, acute or chronic infections, faulty elimination, or emotional disturbances. The exciting substance may be found in clothes, furniture, and the materials used in certain occupations.

A Peculiar Case
The underlying cause may be insignificant and difficult to find. Sensitivity to drugs as a cause of hives is often overlooked. This is illustrated by the following story:

A man suffered from hives and noticed that his attacks always occurred when he had a headache.

Answers to Health Queries
Q. M. E. Q.—What should a girl of 20, 5 feet 3 inches tall weigh?
A.—She should weigh about 110 pounds. This is about the average weight for one of this age and height as determined by examination of a large number of persons. A few pounds above or below the average is a matter of little or no significance. (Copyright, 1932, K. F. S., Inc.)

MOVE IS STARTED TO SAVE STATION

MT. ANGEL, Jan. 28—A conference was held Wednesday between a committee, consisting of Paul Schwab, Otto Oswald and P. N. Smith, appointed by the local business men and A. A. Mickel, S. P. district freight and passenger agent, to discuss ways and means of saving the Southern Pacific depot which the railroad has threatened to close on account of insufficient revenue accruing from its operation.

Public sentiment in Mt. Angel is very much against closing the depot as it would mean a great inconvenience and take away a small payroll. The committee made many suggestions as to how the railroad service could be improved to compete more favorably with truck transportation.

From the carload shipment standpoint Mt. Angel has always been a good shipping point and judging from the fact that Mt. Angel is now the second largest hop-growing district in Oregon, should continue to do so.

P. N. Smith, city recorder, said that the city council was considering an ordinance requiring small delivery trucks coming into town to pay a nominal city license.
