Druggists Offer Trial Size of New Antiseptic by Vicks; A 25c Value for Only 10c

Furnish Mouthwash and Gargle Users With Proof of Quality and Amazing Economy of Latest Product by Makers of VapoRub

NEW BAN ON HALITOSIS

Does All an Oral Antiseptic Can and Should Do—At Half the Usual Price of Other Quality Antiseptics.

Local druggists are introducing a new antiseptic, made by the makers of Vicks VapoRub. It is called Vicks Vorate Antiseptic. It does everything that an oral antiseptic can and should do—and at half the usual price of other quality antiseptic mouth-washes and gargles.

Of course, the only real proof of the economy and quality of Vicks Antiseptic is actual use in your home. To furnish this proof, druggists everywhere are being supplied—below cost—with a special trial size bottle. It contains 2 1/2 ounces—a 25c value. The price of this trial size is only 10c—while they last.

No extravagant claims are made for Vicks Antiseptic. It is simply the best oral antiseptic Vicks Chemists could produce—aided by the chemists, bacteriologists, and pharmacologists of their 16 allied organizations in America, England and Germany.

Mild Enough, Strong Enough

These scientists examined the whole field of oral antiseptics. Some they found were too weak. A few were too strong for regular use in the mouth. Most were very good. But all were much too expensive.

So they produced a balanced antiseptic—mild enough to be used day in and day out without risk to delicate membranes; yet strong enough to do everything an oral antiseptic can and should do.

For All the Usual Uses

You can use Vicks Antiseptic in your customary way, for bad breath (halitosis); as a mouthwash; as a gargle; as an antiseptic lotion for minor cuts and abrasions; and for all the other customary uses of an antiseptic of this type.

And Vicks Antiseptic has this additional unique advantage—born in a depression year, it is priced accordingly. The regular price is a large 10-ounce bottle—a usual 75c value—but is priced at only 85c—Adv.
