Now just give us a little time

and we'll solve this money question for you. We're still workin on our own problems yet of course. Not that the money we have is causin us any worry. It's your money thats worrin us—we're like that you know always thinkin of the other fellow especially of his money. Its a good thing we're good at figurin. Now for instance take the sales tax, now folks theres an easy one. Taking last years figuers and doin a little extra computin such as on aught's and a figures a figure we find the State gits all the proffits and we still owes em three dollars and thirty-three cents. Oh well, that a lot better than sending all the money out of the community to Wall street. We have a hunch its a pretty good idea to keep what little money there is left here in the community. Spend it with local business houses. Let the other cities take care of them selves for awhile. If there was a saving to be made it might be different but a little figuerin on your part will show the real saving in foods is right here at the market.
