EGG MART SETTLES DOWN AFTER GAINS

Two-Cent Increase is Held Along Coast; Exports Above Year ago

CORVALLIS, Ore., March 9—(AP)—Egg markets fluctuated considerably the past week but ended with a net gain of two cents in Portland and remained fully steady elsewhere along the coast, it was stated in a review issued today by the U. S. D. A. bureau of agricultural economics cooperating with the O. S. C. extension service. In the east prices also reacted upward with Pacific coast eggs reaching 2 1/2 cents, just a half cent under a year ago.

Production for the week was variable, with California output showing a heavy seasonal increase to near the season's high point, though Washington and Oregon appear to be slower in reaching the peak, as is customary. As a whole, however, Pacific coast production is running 10 to 15 per cent under a year ago.

Through the middle west the full effect of the February cold wave is just being felt, with collections at packing plants showing a sharp decrease last week. Storage operations are going forward with considerable confidence in the present price level.

Exports of case eggs from the United States totaled 149,000 cases in January, mostly to Central America and the West Indies. This was more than 100,000 cases short of January a year ago, while imports of dried and frozen eggs exceeded 1932 for the same month.

SPRING LAMBS REACH PORTLAND OUT-STATE BUTTER COMING IN

Salem Markets

Grade B raw 4% milk, co-op pool price, \$1.20 per hundred.
Surplus 95c.
(Milk based on semi-monthly butterfat average.)
Butterfat—Sweet, 18c; sour, 10c.

Local Bids are More Profitable Than California's

PORTLAND, March 9—(AP)—Portland was attracting considerable out-state butter as a result of its bids for top scores which make it more profitable to ship to this city than to California points. Local make was very spotted in volume with the late total surprisingly limited although here and there some increase was noted. Lack of banking facilities has been the chief factors in creating a shortage of butterfat offerings here.

Many dairymen appeared unwilling to continue to make shipments to market and receive checks with no money in sight. Some that had shipped previously and had a handful of checks but could get no actual money for their needs, were discouraged.

There was no change in values for the day.

Market for eggs was without general change for the day. There continues a small supply with demand seemingly sufficient to keep offerings cleared from day to day.
