CONVICTS' REFORM FOUND IMPOSSIBLE

Chaplain Eriksen Declares Penal System in Oregon Is far out of Date

No reform for Oregon penitentiary inhabitants, and especially for the 50 boys from 14 to 20 years of age, is possible under existing circumstances, long outmoded, Rev. P. W. Eriksen, chaplain, told the chamber of commerce luncheon gathering yesterday.

Chaplain Eriksen recommends that the younger "criminals" be segregated from the older group through housing in a building of their own; that indeterminate sentences be used; that larger vocational scope be created; and that each town and city should create a board of unbiased citizens who will make an effort to find jobs for those who are paroled or finish their terms.

FUNERAL IS TODAY FOR MRS. SACKETT

Was Prominent in Church, Civic Work; Active up To day of Death

Funeral services will be held at McMinnville at 1:30 p. m. Tuesday for Mrs. Hattie Schenck Sackett, 66, who died suddenly at her home there early Easter morning. Graveside services will be held at 4:30 p. m. at the Masonic cemetery at Albany.

Mrs. Sackett had been active until the day of her death although her health had been impaired for the last three years. She had made plans to attend a family reunion Sunday in Salem. Death came from a heart attack.

She was born in Fulton, New York, in 1866 and came to Oregon with her husband in 1890, settling near Albany. Later her husband engaged in the general mercantile business, owning stores successively in Jefferson, Coburg and Sheridan. In 1906-1907, the Sacketts resided on Chemeketa street, Salem. They moved to McMinnville in 1924 when Mr. Sackett became judge of Yamhill county.

PAULINA PAULUS IS ACCORDED DIVORCE

Paulina Paulus was yesterday granted a divorce from Gottfried Paulus, and given custody of six children and \$20 per month support. She was also granted their house.

The Paulus divorce case occupied the entire day before Judge Lewelling in circuit court here, and was going on at the same time Judge McMahan presided in department one, where damage action brought by J. E. Bronkey against Clifford Olson was being heard. Bronkey is suing for \$6,501 for injuries allegedly sustained as result of defendant's carelessness.

Mrs. Sackett had been an active worker in the Methodist church for 45 years. She was a former regent of the Daughters of the American Revolution, a former president of the local W. C. T. U., of the Women's Foreign Missionary society and the Ladies' Aid of the Methodist church. She was a member of the P. E. O. sisterhood at McMinnville, of the Delphian order, and was a patroness of the Zeta Chi sorority at Linfield college.

FACTORY WORKER ILL SIX WEEKS

Able to Work Again After Taking Lydia E. Pinkham's Vegetable Compound

"I work hard in a factory. At one time I was home for six weeks, too weak and run-down to work. I tried different medicines and I was all discouraged but after I started taking Lydia E. Pinkham's Vegetable Compound I could feel myself gaining strength. It built me up so I can work." —Hazel V. Smith, 97 Norfolk St., Cambridge, Mass.

THE SECRET IS OUT

76 ANTI-KNOCK LEADERSHIP MADE POSSIBLE BY BLENDING OF 4 GASOLINES

IN THE way 76 is made we find the secret of its anti-knock leadership.

FIRST Crude oils of high quality are run through modern, continuously operating stills to produce two "straight run" gasolines—one light and the other heavy. The light gasoline is not only rich in fractions which provide quick starting and rapid acceleration, but it has high anti-knock value as well.

SECOND The heavy gasoline gives speed, power, and good mileage but in its original form is deficient in anti-knock qualities. To build these up and still retain its other characteristics it is "reformed" by a new process which operates at temperatures above 950° Fahrenheit.

THIRD Carefully selected heavy oils, much heavier than kerosene, are subjected to a combination of high temperatures and tremendous pressures. This process produces a "cracked" gasoline of extremely high anti-knock value.

FOURTH Natural gas produced with crude oil from the wells is treated to recover from it a small amount of volatile material called "natural gasoline." This is collected, transported under pressure to the refinery, and "stabilized" to remove from it the fractions which would cause vapor locking trouble in use. The "stabilized natural gasoline" has the ability to maintain high knock resistance under severe summer operating conditions.

THEN All 4 gasolines are purified to be certain that objectionable gum, acid, and other harmful ingredients are removed.

FINALLY The 4 gasolines are scientifically blended to produce 76—the highest anti-knock non-premium fuel ever offered.

New Motor Method of Anti-Knock Testing
As a further protection to the quality of 76, the Union Oil Company has installed the new official Cooperative Fuel Research "motor method" test engine approved by the American Petroleum Institute. This is the present standard method for accurately testing actual road performance in the laboratory.

YOUR GAIN
The increased anti-knock of 76 not only means new smoothness and the elimination of knocks—it means more power and MILEAGE than any fuel selling for the same price.
Don't pay \$1.00 for gasoline and get 50¢ worth of anti-knock power and mileage. Use 76 and get your full dollar's worth. Here is your guarantee:
The 76 Guarantee!
If, after you try 10 gallons of 76, you do not recognize an improvement over any non-premium fuel you have used—just return your receipt and we will refund the amount of your purchase in cash.
Easy to Find
To secure 76 just watch for the big orange and blue 76 banners. Then be sure the gasoline you get is colored orange—and comes from the 76 pump.
Accept nothing "just as good"—because there isn't any. Insist on 76.
