LOST LAKE CHOSEN FOR CHEMEKETANS

Lost lake, on the north side of Mt. Hood, will be the camping place for the Chemeketaans during their annual outing this year. The dates set are August 6 to 20. The outing committee held a meeting at the Marion hotel yesterday noon and made final decisions respecting plans for the annual camp.

This will be the first time an annual outing has been held in the Mt. Hood country. Previous camps have been located at Marion lake in the Mt. Numerous short trails lead from Lost lake to interesting places in the area. The climb of the mountain will be made from the north side, starting at Cloud Cap inn, and crossing the head of Elliott glacier. This is the route taken by the parties from Hood River, but most Chemeketaans have made the climb from the other side, starting at Government Camp.

The court held Feskens entitled to the return of his payments with interest and taxes, less rent on the place at \$20 a month. Counsel for the plaintiff indicated late yesterday an appeal would be taken.

G. E. ATTITUDE ON FILMS MISQUOTED

Misinterpretation of one resolution passed by the state convention of Christian Endeavor, in session in Eugene from Thursday to Sunday, is reported by local delegates who attended. The resolution related to motion picture shows, but did not place the convention on record as opposed to movies, but rather as recommending that young people select the pictures they wish to see, just as they should choose the better books for their reading pleasure.

Almost 1300 delegates were registered at the convention, which has been exceeded by but two previous yearly sessions. A fine spirit prevailed throughout, with an exceptionally fine program. Depression was even evident, as for instance with one group that traveled several hundred miles in an open truck to attend. However, one observer opines that the economic situation made the convention even finer.

Acid Condition Is A Danger Sign

Acid condition means trouble ahead unless it is given immediate attention. It is often caused by mineral shortage—a lack of some of the essential cell-salts needed by your body. Dozens of local people have ended acid condition by drinking CAL-O-DINE, a natural mineral water which contains all of the cell-salts and minerals essential to life—in natural form, assimilated by the blood stream. Let us tell you about their results. Get a bottle, today. It is pleasant to drink and a half-gallon will last you a whole month. Something to Say

not just saying something

A friend of CHESTERFIELD writes us of a salesman who had "something to say":

"I dropped into a little tobacco shop, and when I asked for a pack of Chesterfields the man smiled and told me I was the seventh customer without a break to ask for Chesterfields. 'Smoker after smoker,' he said, 'tells me that Chesterfields click with them . . . that they're milder and taste better. I sell five times as many Chesterfields as I did a while back.'"

Yes, there's something to say about Chesterfields and it takes just six words to say it — "They're mild and yet they satisfy."
