CAMEL'S costlier tobaccos do taste better

Sally only knows—
"It's so very GOOD"
BUT SALLY'S MOTHER KNOWS—SHE NEEDS ITS EXTRA BENEFITS TOO!

Of course children think Post's Bran Flakes is just delicious to eat! But wise mothers know that it also acts as a safe, simple precaution against constipation due to lack of bulk in the diet... an often unsuspected trouble that may lead to listlessness, ill temper, "low" spirits.

For years, Post's Bran Flakes has served as a safeguard against this condition... For it provides the necessary bulk that so many foods lack... thus helps to prevent intestinal sluggishness, and to insure normal elimination of food wastes. It is also rich in phosphorus, iron, and Vitamin B.

That is why Post's Bran Flakes belongs on this proven program: Outdoor exercise... water to drink between meals... fresh fruits and vegetables in the diet. And a generous daily helping of Post's Bran Flakes.

All your family will love it, plain, or with fruits or berries... So start serving it today. Order the large-size Economy Package—a product of General Foods.

Henry Ford
Dearborn, Mich.
May 15, 1933

Time and again I am told—by my own organization and by others—that I penalize myself by quality.

Friendly critics protest our putting into the Ford V-8 what they call "twenty-year steel." They say such quality is not necessary; the public does not expect it; and that the public does not know the difference anyway.

But I know the difference.

I know that the car a man sees is not the car he drives—he drives the car which the engineer sees. The car which is seen, comprises beauty of design, color and attractive accessories,—all desirable, of course. The best evidence that we think so is that they are all found on the Ford V-8.

But these are not the car. The car proper, which is the basis of all the rest, is the type of engine and its reliability; the structure of chassis and body, ruggedly durable; the long thought and experiment given to safety factors; the steady development of comfort, convenience and economy. These make the car.

A car can be built that will last two or three years. But we have never built one. We want the basic material of our car to be as dependable the day it is discarded as the day it is bought. Ford cars built 15 years ago are still on the road. It costs more to build a durable car—but two items we do not skip are cost and conscience. A great many things could "get by"—the public would never know the difference. But we would know.

The new Ford V-8 is a car that I endorse without any hesitancy. I know what is in it. I trust our whole thirty years' reputation with it. It is even better than our previous V-8. It is larger, more rugged and mechanically a better job all round.

I readily say this in an advertisement because I know the car will back it up.
