Things Everybody Desires To Know About Big Circus

Ever want to ask a lot of questions of somebody or other when you were at the circus, things that the program didn't tell anything about?

An agent of the Al G. Barnes circus came to town recently to say that it is to exhibit in Salem on Saturday, June 24. He was asked to jot down some odd facts about the big show. Here they are:

Travels on three special trains. Out of 200 places visited in a season less than 20 are played for more than one day. Travels 20,000 miles in a summer. Exhibits more than 1000 jungle animals. Carries more than 1000 people on tour all of whom are given three meals each day in the circus dining tents.

Scores of ring-stock horses used in performance. 2,200 stakes driven and pulled services at the Baptist church Sunday night, June 18 at 7:45 o'clock.

A complete new set of canvas used each spring. Tents contain 42 miles of rope. Supposedly "untameable" zebras taught to draw a float in tournament.

Does not use local light plant, but carries its own dynamo wagons. Has employees who have been with the show for many years. As many acts shown in one performance as are given in many theatres in an entire season. Sixty clowns running in age from 18 to 82 years old.

Always opens its season in California the third week in March. Gives its final performance in some one of the Pacific seaboard states late in November.
