REMOVAL OF HINES VETERANS' DEMAND

CINCINNATI, June 29.—(AP)—Immediate removal of General Frank T. Hines as director - general of the veterans' bureau was demanded by the Disabled American Veterans of the World War today in a turbulent session.

Bitter because the government's economy program reduced allowances given disabled ex - soldiers, the veteran's convention demanded that Hines be dismissed without a pension; booed Congressman Byron Harlan of Dayton, O., when he attempted a defense of the program, and "condemned" Lewis W. Douglas, director of the budget, "for his hostile attitude toward the disabled veteran and repudiation of promises."

Harlan's defense of the administration's policy was almost drowned out by the jeers that swept the auditorium.

General Hines addressed the convention yesterday but was not here today when a two - paragraph resolution was approved asking President Roosevelt immediately to remove him and J. C. O'Roberts, his assistant, and to consult veterans organizations before appointing their successors.

WASHINGTON, June 29.—(AP)—A widely scattered federal building program on which excavations can start within two weeks after presidential approval and which will cost approximately \$400,000,000 will be taken up Saturday for a decision by the cabinet board in charge of the \$3,300,000,000 public works fund.

The program is composed of works requested by 60 or 70 governmental agencies and will be the first list of projects proposed directly by the cabinet board. Its previous \$400,000,000 highway allotment and \$238,000,000 for naval construction were lump sum provisions.

After the board acts, President Roosevelt must sanction the recommendations before construction starts but Donald H. Sawyer, the public works administrator, said "the dirt will be ready to fly" within two weeks of the chief executive's approval.

FURNITURE BUYING ORGY EXPERIENCED

Code to Prevent Piracy of Designs is Adopted by National Council

CHICAGO, June 29.—(AP)—A code to prevent piracy of designs was announced by the national furniture designers council today coincident with the widest buying orgy the American furniture mart has seen since 1925.

It labels as "unfair competition" the appropriation by one factory of another's designs. The code, approved by the national and southern associations of furniture manufacturers, will be submitted as part of the furniture industry's code, to the government industrial recovery board.

While the designers were acting, furniture retailers from all sections were frantically demanding their orders. They are aware that a reversal of trade trends such as the industry has seldom seen.

The annual July market opened Monday. Buyers, while aware that price advances were contemplated, came prepared to deal with the manufacturers as they had the last two years — at their own terms.

They bought—slowly, cautiously—and the manufacturers accepted orders for delivery at a specified time and at a definite price.

Tuesday, manufacturers, especially those of the Virginia and North Carolina districts where most of the nation's medium priced furniture is produced, heard Washington rumors they would be required to advance the hourly cost of their labor under the industrial recovery bill from as low as 15 cents to 35 and possibly 45 cents an hour.
