tion's two bread grains had been

"cornered" went hand in hand to-

day with 25 cents a bushel ad-

vance for rye during the last

To "corner" a commodity means

that one or more owners have

worked themselves into a posi-

tion which would enable them to

name their own price. Such a sit-

uation in any grain is opposed to

the rules of all organized ex-

changes, and the attempted en-

forcement of speculative contracts

involving unwarranted values

would almost certainly lead to

sensational developments recall-

ing times when trade ethics were

Evidence that a "corner" now

exists in rye was seen by many

traders today in the fact both

that the rye market had soared

25 cents during the last three

days and that regardless of tariff

duties the importation of 600,000

bushels of rye from Canada had

been arranged for, with thou-

sands of bushels more under ne-

gotiation not only from Canada

Rye jumped 54 cents a bushel

oday, and with wheat, corn and

barley far surpassed all recent

high-price records. The principal stimulating factor, aside from in-

dications of a "corner" in rye was

an authoritative estimate that the

Canadian 1933 wheat crop out-

look rivaled the acute crop short-

age in the United States, and

promised to be 50,000,000 bushels

With San Francisco entering the market rather late Tuesday for its needs, the market for celery continued to boom for shipping account. Carload prices were being firmly held around \$1.75 for half crates.

Squash market was weak at 35-50c flat crate. All berries were in more active call with the exception perhaps of blackcaps.

Increasing call for currents was stiffening the price. All country killed meats were in good call at late prices.
