## "I PICKED PLYMOUTH BECAUSE IT'S A Sweet-Running Car!"

A CERTIFIED INTERVIEW WITH MR. GEORGE R. STEVENS, 1006 SPRING STREET, ELGIN, ILL.

"It's a piece of real Precision Engineering" ... says this Watchmaker

PEOPLE like Mr. Stevens understand why Plymouth carries "details" so far. Four rings per piston instead of three. Four crankshaft bearings. Full pressure lubrication—not hit-or-miss splash.

Those things are good engineering. Of course they're details—when you compare them in importance with floating Power engine mountings—hydraulic brakes—safety-steel bodies.

But details count—and we'd like you to see how much. "Look at all three"; and see for yourself why Plymouth is growing so fast.

The Past intruded on her Triumph

"Those European stars always have one foot in the mud," said the theatre manager cynically. Ushers had just ejected a disreputable looking foreigner. The fellow had thrown himself at Leni Luneska as she entered the lobby for the premiere of her greatest picture. Why was she disturbed at this man's appearance—what did he know that could upset the glamorous, aloof Luneska—greatest star in Hollywood? Be sure to read...
