

SEWAGE PLANT PLEA IS HEARD

Arthur Moulton Urges Support of Silverton Voters to get Funds

SILVERTON, July 20.—"There has never been a more apt time to build a sewage disposal plant than right now," said Arthur Moulton, as he spoke before a group of Silverton voters at the city park Wednesday night.

Mr. Moulton went on to explain that many organizations were up in arms and were forcing cities to build the plants. Health authorities were worried because of health conditions of the Willamette river. From Salem to Portland, Mr. Moulton explained, the Willamette river is just one breeding place of typhoid and other germs. No trout life can live there. The Columbia river slough is but a cess pool, he said, and it used to be the Portland fishing paradise.

The swimming hole in the park at Silverton attracted a large number of people during Mr. Moulton's address. Mr. Moulton smilingly remarked that people were more concerned with the blessing they have than with worrying about what might happen to them. He spoke of what a blow it would be to Silverton should some little city or just a small settlement open up shortly above Silverton and dump its sewage and waste into Silver creek. It would spoil Silverton's pool but the settlement would have as much right to do this as Silverton has and it can be looked for at anytime.

Mr. Moulton also remarked that Klamath Falls and La Grande had been forced to build sewage disposal plants at a high rate of interest. He said that if the city would not be forced to do this.

But just now, he said, the government is willing to help and all cities should avail themselves of the opportunity.

"Formerly," he explained, "we'd have to vote bonds and pay back by taxation at a high rate of interest. We will have to do this again if we wait." The town will likely secure 30 per cent of the cost of its plant as an outright donation from the government, and the other 70 per cent can be borrowed from the R. F. C. at a 3 1/2 per cent interest with 40 years to repay, he said.

"You have to vote your bonds," he explained, "but the government stands ready to take them off your hands as soon as the plan is under way." Local labor will be employed and the R. F. C. requires that the plant be self-liquidating so that even its maintenance does not fall on the taxpayer. The cost of maintenance should not exceed 20 cents a month.

Dr. P. A. Loe, city health officer, was chairman of the evening and introduced the speaker. Mr. Moulton was very high in his praise of the Silverton park in which the meeting was held. He also prophesied that the sewage disposal plant issue would carry by a big majority at Portland.
