

DESCHUTES WATER PROJECT FAVORED

BEND, Ore., Aug. 4.—(AP)—Prospects for the construction of the Benham Falls reservoir looked brighter today, after receipt of a telegram from Senator Charles L. McNary indicating arrangements have been made to have the reclamation bureau make a survey of the central Oregon project.

The Deschutes project association, recently revived after a few years of inactivity, has been seeking funds for a survey of the reservoir site and a study of the project to store some 250,000 acre feet of water during the non-irrigating season.

Senator McNary telegraphed in response to a wire from Robert W. Sawyer, chairman of the Deschutes project association, that he had discussed the situation with various agencies of the government and thinks he has it arranged so that the reclamation bureau will make the necessary survey.

Construction of the Deschutes project would not mean bringing new land into production, but rather would provide sufficient water supply for farmers now suffering from a shortage.

Previous communications from Senator Steiwer quoted the administrator of public works as ruling that the Deschutes project is without the character eligible under the public works act.

F. R. AID IN MILK WAR IS SOLICITED

BOONVILLE, N. Y., Aug. 4.—(AP)—An appeal to President Roosevelt by the leader in New York state's rapidly spreading milk strike to "supersede the state in this matter" and a threat of the state milk control board to permit milk importations from neighboring states unless the strike is ended, marked the third day of disturbances in a producing holiday. Ten thousand additional farmers were drawn into the maststrom yesterday.

Attacking the classification policy of the state board as not giving the farmers any profit, while dealers and certain marketing associations take "extraordinary high profits," Albert Woodhead, managing in the Empire Dairyman's Protective association, strike backers, wired the president that the board had not accorded the farmer "a sympathetic consideration."

At Albany tonight Governor Herbert H. Lehman directed Major John A. Warner, superintendent of the New York state police, to investigate charges that state troopers had been "brutal" in dealing with striking dairy farmers near Boonville.

Welcome Extended To Rain; Will Aid Fields and Gardens

LIBERTY, August 4.—Recent rains come as a benefit for dry fields and gardens at this time. No great damage to crop harvest will result as the berry and cherry picking is almost over. The last large picking of Lamberts will be completed today in the Harry Elgin orchard.

There is still some hay in the fields in places where haying was a little late, though if the showers do not continue any heavier it will not be hurt to any extent.

The rain is about two weeks earlier this year than last, as last year the first summer showers came on the night of August 15. The rain is being used by several farmers as an opportune time to plant fall turnip seed.

HARDWOOD PLANTS WILL ACCEPT CODE

PORTLAND, Ore., Aug. 4.—(AP)—Approximately 500 workers in the hardwood industry of Oregon and Washington will be affected by President Roosevelt's national recovery administration blanket code, it was decided by the Northwest Hardwood association, organized here yesterday.

Harry L. Potter of Portland, elected secretary of the association, directed the following telegram to President Roosevelt last night:

"The Northwest Hardwood association, composed of producers of hardwood logs and lumber in Washington and Oregon, was formed here today for the purpose of immediately putting into effect the N. R. A. blanket code and to give full and hearty support to your industrial recovery program."
