"We needed hot water 24 hours a day ...but thought we couldn't afford it"

said Mrs. M. M. Munson
owner of the Munson Rest Home

Pepco's Free Survey Showed her how it could be done—now she has constant hot water at low cost

Read Mrs. Munson's Comments:

"It is imperative that we have hot water at all hours of the day and night to take care of our 15 patients' needs. For years we struggled along turning water heaters on and off, and even maintained extra heat in our furnace to keep the water coils hot. I always had the idea that heating water electrically was prohibitively expensive until your survey showed that I could have 24-hour service at about the same cost as our old method, so I decided to try it. We're delighted with it! What pleases me most is that it costs even less to operate than the old unhandy system, which did not deliver anywhere near the same service. It's simply wonderful to have hot water on tap 24 hours of the day without a bit of trouble to anyone."

THIS SEAL OF APPROVAL

goes on all of the new type engineered hot water installations. It is your guarantee of adequate hot water service.
