# TO PUSH APPEAL ON TRUCK CASE

While the abstract of the state's appeal on the mooted bus and truck legislation of 1933 has been prepared, it has not yet been presented to the state supreme court. It was learned Wednesday at the state house. The state, defending the law in the case of Anderson against Thomas, lost in the circuit court here in August when Judge L. G. Lewelling ruled a substantial portion of the bus and truck law unconstitutional.

Until the state completes its notice of appeal and files its abstract and brief with the supreme court, opponents of the bus and truck law continue to operate under the injunction granted by Judge L. G. Lewelling, which prevents the state collecting a portion of the taxes specified in the 1933 enactment.

Officials of the highway department expressed themselves yesterday as desirous of the earliest adjudication of the mooted law that is possible in order to guide the legislature if that body is called in special session here.

The highway department is also eager to increase its revenues which are falling far below estimates made last winter due to the injunction on bus and truck collections.

Jordan was convicted of first-degree murder in the Klamath county circuit court and has been in the state penitentiary here for several months.

The case previously was re-manded for retrial by the state supreme court.

# GIVE RULING ON EXPENSE ADVANCE

The state board of control has authority to advance \$1300 to pay the expenses of W. F. Lipman and Harry M. Kenin on a trip to Washington to appear before the national farm loan credit association in the interest of a \$5,000,000 loan for the northwest flax growers association, provided that such loan is considered necessary in the operation and proper conduct of the state flax plant, Attorney General Van Winkle held in an opinion Wednesday.

Lipman and Kenin told members of the board that the flax growers association had completed all preliminary work in connection with the proposed federal loan, but that it had no funds available to send representatives to Washington.

The program outlined by the flax growers association contemplated the construction of a large flax mill in Salem and the operation of branches in many other sections of the state. Kenin said the annual outlay for labor and materials would exceed \$1,000,000, provided the federal loan was approved.

# SCHOOL DISTRICTS NEEDING RELIEF

A minimum of \$1,000,000 will be required for school relief in Oregon during the next 12 months while a much larger amount could be used to good advantage, Charles A. Howard, state superintendent of public instruction, has stated. School relief was one of two purposes for which the governor's committee of 32 recently asked him to call a special legislative session.

Howard declared that he already had received reports from 21 of the 36 counties regarding their warrant indebtedness. He said these figures proved conclusively that \$1,000,000 would go far toward remedying the existing financial condition but that additional money would be required if the problems now confronting the school districts were in financial distress and would not be able to open their schools unless they receive relief.

# Man Found Dead; Cause Uncertain

Cyril Dvorak, about 65 years of age, was found dead in a chair in his room over the WCTU hall Wednesday by E. Bumaughan. The cause of his death was uncertain yesterday as, although he had been seriously ill with dropsy, a chemical labeled strychnine was found in the room. This was sent to the Willamette university laboratory, and if it proves to be a poison, an autopsy will be ordered.
