

SCIO BUDGET UP OCTOBER 5

Rainy Weather Slows Work On Reservoir; Rich ore Bodies are Found

SCIO, Sept. 26.—The Scio town council is to meet with the budget committee on Thursday evening, October 5, for the final consideration of the budget for 1934 as presented and discussed at a recent special meeting. Taxpayers of Scio are invited to attend and participate in the deliberations.

Mr. and Mrs. Jack Hale, who have made their home in California for two years, and who recently acquired and took possession of a 40-acre farm five miles east of Lebanon, have returned to California for the winter. Mr. Hale has employment with a poultry house which specializes in baby chicks handling many thousands each year. They expect to return to their farm later next spring.

Reservoir Work Delayed

Work has been delayed considerably in connection with the erection of the new \$600,000 galvanized reservoir for the Scio water system, by inclement weather during the last week or 10 days. In the meantime water from the deep well has been pumped directly into the mains, the supply being shut off at night. Surplus flow has been turned into Thomas creek in the absence of a reservoir.

The 1933 Mining Season in the Elkhorn District East of Scio is Said to Have Shown Splendid Developments.

Bodies of ore rich in copper, gold and zinc are reported to have been uncovered and developed.

Bridge Job Progresses

Work is reported progressing on the new Sanderson bridge, which is scheduled to be completed on January 1. Some have expressed apprehension that high water this fall and early winter may interfere with construction work. The temporary bridge was swept away by freshets in November last year. Thomas creek in Scio has been considerably swollen at times during recent rains, which were reported very heavy in the higher reaches of the stream's headwaters.

AMERICANS TAKE REFUGE AT CLUB

HAVANA, Sept. 26.—(AP)—Seven Americans, mainly officials of a sugar mill closed by a general strike in that region, were in refuge at the Puerto Padre Yacht club in Chaparra, on the north coast of Oriente province, while an American destroyer stood by in the bay.

An acute situation prevailed in that territory, as a dozen small towns went without light, water or rail facilities due to labor troubles which spread throughout most of the province. The strikers cut wires of the Chaparra Light and Power company.

Besides the American destroyer Hamilton, a British freighter stood by in the bay.

Meanwhile Juan Blas Hernandez, veteran revolutionary leader against the former regime of Gerardo Machado, came here to visit resident Ramon Grau San Martin at the palace and denied recent reports he had been up in arms against the government.

PURCHASE OF OLD WATER PLANT OUT

The city of Salem will not be allowed to use any part of its prospective loan of \$1,500,000 from the federal government for the purchase of the existing plant of the Oregon-Washington Water Service corporation, Senator McNary has advised city officials.

McNary said that government officials already had started preparing the contract which probably would be completed within the next 10 days. Money derived through the loan will have to be used for new construction under the federal regulations.

Officials said this meant that the city would have to establish a new water supply instead of taking over any part of the present water system.

Unusually Early Snowfall Visits Mounts at Gates

GATES, Sept. 26.—Claud Sellard came home from Whetstone mountain Friday night where he has been for the past few weeks building a look-out for the forestry service. Sellard reports rain fell in sheets, making torrents of small streams and that snow fell with about two inches on the ground in the vicinity of Elk lake.

Sunday evening, following a rainy day, Gates residents looked up to Sardinie mountain and Monument peak and saw the cooling, the first of the season and unusually early.
