"WHAT HAPPENED TO THAT BRIDE AND GROOM ACROSS THE STREET? I DON'T HEAR THEM QUARRELING AFTER DINNER ANY MORE!"

"I TOLD HER ABOUT CALUMET BAKING POWDER AND SHOWED HER THAT PIECE IN THE PAPER. SHE BOUGHT SOME CALUMET—AND NOW HE EATS OUT OF HER HAND!"

**Hint to Beginners**

Cake failures are often due to mistakes with baking powder. It is important to choose an efficient baking powder and to use the right proportion.

Expert cake-makers prefer Calumet, the Double-Acting Baking Powder. It gives a velvety texture to cakes and beautiful lightness to quick breads.

Its two actions, one in the mixing bowl and the other in the oven, protect the batter all through the baking. And so efficiently that less is required—only a level teaspoon of Calumet to a cup of sifted flour in most recipes.

**Orange Dessert Cakes—(1 egg)**

- 2 cups sifted Swiss Down Cake Flour.
- 8 teaspoons Calumet Baking Powder.
- 2 teaspoons salt.
- 2 tablespoons grated orange rind.
- 2 tablespoons butter or other shortening.
- 1 cup sugar.
- 1 egg, beaten.
- 1/4 cup raisins, finely cut.
- 1/4 cup milk.
- 1/4 cup orange juice.
- 1/4 cup sugar.

Sift flour once, measure, add baking powder and salt, and sift together three times. Add orange rind to batter and fluffy. Add egg and beat very gradually, and cream together until light and fluffy. Add flour, milk, and sugar, and cream together until smooth. Bake in greased pan, 8 x 8 x 2 inches, in moderate oven (350° F.) 30 minutes. Cool cakes 1/2 hour. Combine orange juice and sugar and stir until sugar is dissolved. Spread part of mixture over cake, repeating at intervals until all has been used. (All measurements are level)
