## WHEAT ALLOTMENT FINAL DATE NEARS

**Sign-up Opportunity Will Close Thursday Says County Director**

The final date for signing applications under the wheat allotment plan in Marion county is Thursday, October 5, according to H. A. Lindgren, in charge of wheat campaign in Marion county. Lindgren reports many growers are calling at the office each day, as well as contacting committees in different parts of the county, learning details of the plan and where they are eligible, as a rule they are signing the application forms.

Numerous questions have been asked concerning disposal of the crop where a man signs a contract under this plan. Lindgren states that it does not matter how one disposes of the crop. He may sell it, feed it on the farm, or seed it, just as he pleases.

To state the idea just as plainly as it can be put, the government gives the farmer a benefit payment on 54 per cent of his three-year average production in bushels, if he will agree to reduce his average wheat acreage by 15 per cent. In other words, the farmer is renting this 15 per cent to the government for the three-year period, but the government, on the other hand, specifies that the land can be used in summer fallowing, controlling weeds or for growing crops that would be consumed by the farmer or his family on the farm. It is specifically stated under this contract, that nothing can be raised on the 15 per cent taken out of production, to sell directly or indirectly.

# about Cigarettes

Of all the ways in which tobacco is used the cigarette is the mildest form

**YOU** know, ever since the Indians found out the pleasure of smoking tobacco, there have been many ways of enjoying it.

But of all the ways in which tobacco is used, the cigarette is the mildest form.

Another thing—cigarettes are about the most convenient smoke. All you have to do is strike a match.

Everything that money can buy and everything that science knows about is used to make Chesterfields.

The right home-grown tobaccos—seasoned with just

enough aromatic Turkish—are blended and cross-blended the Chesterfield way.

Then the cigarettes are made right—firm, well-filled. Chesterfield uses the right kind of pure cigarette paper.

There are other good cigarettes, of course, but Chesterfield is

the cigarette that's milder, the cigarette that tastes better. Chesterfields satisfy—we ask you to try them.
