WEST SALEM GETS 40-FOOT WAY, SAID

Expect Contracts on Widening to be let Within Another 60 Days

WEST SALEM, Oct. 10.—The West Salem to Rickreall highway work is listed among the improvements to be taken care of in the six million dollar federal appropriation to be made in Oregon. West Salem residents are informed that a minimum of 40 feet will be paved through West Salem and a 20 foot straightened road from the outside city limits to Rickreall, which will be built upon the latest scientific road building methods. This, together with improvements between Junction City and Corvallis now under way, will provide a most drivable highway between Salem and Eugene.

Traffic over the Marion-Polk inter-county bridge ranks among the heaviest in the state of Oregon, and relief over the narrow 16-foot highway now in use is greatly needed not only because the roadway is narrow, but because of curves and steep shoulders. This very dangerous roadway saw two serious accidents last week, and what might be fatal accidents are averted every day with minor mishaps and crashes frequently in evidence.

It is expected that contracts will be let for this much needed improvement on or before the middle of December. The preliminaries involved after the inclusion in the federal budget are considerably complicated including appraising and condemning, surveying and estimating all of which takes time, so that all things being considered, this is being expedited very satisfactorily.
