Stalin, Pilsudski, Dollfuss are all dictators. Each eyes other nations with envy or hatred. Each girds himself with weapons. Fear, the mother of modern war, gestates in Europe again. The outlook is dismal.

Were it not for the Prussian militaristic revival seen in Hitlerism we would say that Germany is dead right in demanding either arms equality or compliance with the terms of the treaty of Versailles by the victor powers. These nations, headed by France, have refused to carry out their covenant to disarm, yet they insist on a disarmed Germany. If Germany only knew it, that should prove her salvation because she would be free of the crushing burden of armament taxation and could devote herself to economic conquest and internal development. But Germany sees France building border fortresses stronger than ever, sees the huge French army, learns of the cloud of French airplanes. So Germany clamors for her place in the sun, and under Hitler is determined to achieve it.

A new world war promises the end of western civilization. One cannot anticipate war without seeing it succeeded by new "dark ages" in which perhaps the seat of power, of wealth and of culture might pass to the fast wakening Orient.

We may be too gloomy. Bankruptcy may still hold Germany in too tight a grip; but history has many examples of wars waged sometimes successfully, by nations seemingly bled with nothing more serious bankrupt. Patriotism is a great energizer; and we must remember that it is 15 years now since the last war ended; and many of the powers have washed out their debts by re- eral rule, I think, that only bad

Randelph, now a national football here, has been traced from his humble home in tiny Athens, a mid-west factory town, through high school gridiron stardom that made him a magnet for scouts from big colleges and through two years of backfield glory as a superstar at Thorndyke, rich and historic eastern university. He's the idol of fandom, the pet of society, the envy of back - home neighbors, and "my boy" to his adoring Mom and Pop. To the former, he's still her little Tommy and to father, well-Tom's manners and clothes annoy the veteran glassworker who secretly, however, rates his boy on a par with Pop's supreme political favorite, Al Smith. Before Thorndyke had put a high hat sort of halo on him, Tommy's best girl was Dorothy Whitney, daughter of the richest and most important citizen in Athens. But in New York, Tommy has met Elaine Winthrop, society artist and daughter of a Wall Street magnate. More glit-Wall Street magnate. More glit-tering than ever was "Big Jeff" as a senior but in the final game on Thorndyke's schedule, Tale gets a 14-0 lead in the third quarter. Capt. Randolph's Pilgrims seemed doomed when an Eli lineman calls "Jeff" an "old pro". . . . "Jeff" went ber-serk and Thorndyke cut Eli's lead to 14-13. . . Then, with less than two minutes to play, "Jeff" booted a field goal, the Pilgrims winning 16-14, thereby earning the right to play in the Tournament of Roses

If we did not have such complete information of the militaristic policy of Hitler we might rely on the belief that no European power would welcome a renewal of the mad carnage which enveloped Europe. But the march, march, march YC, yes, I know; but they are of German footsoldiers, and every other move under Hitler so dry you don't notice them. The shows the building up of the war spirit. ## The Recall on Meier

COMEBODY with a grouch on the governor has started a D recall. It makes us weep with laughter. The pro-recallers are the ones who beat the tom-toms for Meier under the slogan "clean out the state house". Now they are whetting knives to cut his gizzard out. Meier has only a year and a quarter to serve; and we favor letting him stay in office, \_\_ present to the past. He was of a if for no other reason than to press the noses of those who day that is gone, yet to the very elected him against the emery wheel.

Meier's chief trouble is absenteeism and pubescent peevishness. If he would grow up and stay on the job he could virile, unafraid-an outstanding accomplish a great deal for the state. As it is he stays in Portland, rows like a juvenile with his associates, and so far as state affairs go, lets "the old cat die" as the children say.

The recall is nothing more nor less than a resort to Judge Lynch; and is just a sample of the mobbism which characterizes political activity today. Gov. Meier has not lived up to the advance promises either of himself or of those who endorsed him to the electorate; but he has not damaged the state; instead he has done many things to the state's profit.

## A Preacher on AAA

PREACHER back at a church convention in Columbus, A had the following to say with reference to the AAA program of destruction of crops and swine:

"Christ would condemn to the same burning torment to which he condemned the famous rich man, every farmer who burns the surplus of his granaries; every planter who plants to plow under for gain; every breeder who slaughters to create hunger; every dairyman hijacker who pours into the ditch or sewer milk undernourished children need."

That impresses us as a funny brand of religion. Because a man plows under a row of corn when men are hungry, a merciful deity consigns him to "burning torment"! Our humble opinion is that the plowing under policy is neither wise nor ethical; but we are not ready to send Sec. Wallace to hell for it.

Upriver cities have been holding out against sewage disposal plants on the ground that it was a racket, promoted by vendors of patented devices like septic tanks. The plans of the engineers now working on the projects should show them that their fears are not substantiated. Primary treatment plants only are being recommended for the larger cities. These serve to save the river from undue pollution, and at the same time hold down the cost. Upriver cities may buck but eventually they will have to fall in line,-not to line the pockets of promoters, but to clean up the river.

The labor federation is announcing a boycott on German goods because they do not like the nazi government. We do not like it either; but we abhor boycotts. We opposed the boycott idea in NRA and now want to protest against the labor union boycott of German goods. There was a similar foolish idea against Japan a year ago. A boycott is mass pressure in which the innocent suffer with the

A played-up item in the news of the past two weeks pertains to a jackrabbit which zoomed through the windshield of Jack Gingrich's car while he was making early morning delivery of the Calgary Albertan. Not so much of an item. About a year ago a horse zoomed through the windshield of a Statesman early morning delivery machine.

I asked a Salem youngster this week if he was making any money for himself, and he said he was getting five cents for every dose of castor oil he took but business wasn't very good. Life is certainly discouraging at times.
