## TEST PERFORMANCE OF SIX BATTERIES

"If you stand six well-known batteries side by side, they will look as much alike as peas in a pod except for the names," said Mr. Joe Williams, distributor of Willard batteries for this section. "But that's where the similarity ends. When you put them under test . . . when you measure their life . . . their performance, the tremendous difference in batteries becomes apparent.

"The Willard laboratories in Cleveland recently ran a test of six of the more popular batteries on the market and the results were astonishing. These batteries," Mr. Williams continued, "were stock batteries bought from various dealers. They were put on a six-hour cycle test (five hours charging, one hour discharging) which covers one month of normal life into a few days.

"The first battery failed after 70 such cycles of testing, another at 100, one at 144 and one at 156 cycles. It took 305 cycles of this rigorous test to wear out a Willard battery of the same size and capacity as the other five makes.

"I have never handled a product at our station," added Mr. Williams, "which has given as much service and satisfaction for the dollar as my line of Willard batteries. It's a real pleasure to sell them."

## TEN MILLION SEE FIRESTONE EXHIBIT

The Firestone Tire and Rubber company was the only tire manufacturer participating in the Century of Progress fair at Chicago, according to G. C. Ward, just returned from a ten-day visit there in company with other managers of Firestone Service stores from the northwest.

In the Hall of Science, the Firestone company demonstrated the newest methods in rubber processing.

Firestone also operates a complete tire factory in its own building. The complete steps in tire manufacturing, including the famous Firestone gum-dipping process which has made Firestone tires outstanding in durability and mileage, has been shown to nearly 10,000,000 visitors, Mr. Ward said.

"Judging from the interest shown in the Firestone tire manufacturing process, the exhibit is one of the outstanding features at the Century of Progress," Mr. Ward declared.

## Pick Woodburn High Stock Judging Team

WOODBURN, October 21. — The stock judging team which will represent Woodburn high school at the Pacific International Livestock exposition judging contest has been selected as follows: Vincent Bartos, Howard Kellow, Philbert Hunt and Hubert Seely. Selections were made by the boys' vocational agriculture instructor, Kirby E. Brumfield.

Robert Stauffer is president of the Woodburn high school chapter of the Future Farmers of America. Other officers elected recently are: Philbert Hunt, vice-president; Torlef Nelson, secretary; Lyman Seely, treasurer; Howard Kellow, reported. The election was held at this time of year because several officers did not return to school this fall.

Vincent Bartos took first place in a judging contest held recently at Corvallis, competition being with other members of the Woodburn agriculture classes. Those who went to Corvallis are: Jack Hill, Wilbert Homan, Vincent Bartos, Lloyd Clark, Bill Fobert, Hubert Seely, Robert Koenig, Howard Kellow, Arlie Skiller and Robert Stauffer.

## Look Ahead!

Your present battery may perform satisfactorily right now. But will it stand up under the severe strain of cold weather starting?

If there is a possibility of your needing a new battery during the cold winter months just ahead . . . take advantage of our present prices on genuine Willard batteries . . . and buy now.

## 378 Families Now Get Water From West Salem Source; Finances Good

By MRS. A. L. APPLEWHITE  
WEST SALEM, Oct. 21. — An interesting story is embraced in the metamorphosis of the West Salem Water company. Prior to 1910 those living here used their own open wells but that year Col. C. A. Robertson sunk a test well on the lot now housing the city hall, and beneath the present building. It was not very satisfactory, bearing a highly mineralized content and others were driven and bored, one as deep as 170 feet, in an endeavor to strike an

## Hayesville Has Community Meet With a Program

HAYESVILLE, Oct. 21. — The first meeting of the Hayesville community club met at the schoolhouse Friday night with the new president, Frank Marshall, in the chair.

During the business session an outline of the year's work was presented to the club and approved.

The program was in charge of Carl Ramseyer, president of the Ad club.

The Home Town male quartet composed of Leander, Elvin and Henry Quiring and Sol Ediger gave several very pleasing numbers.

A trio composed of Georgia Hattgeson, Doris Barnett and Kenneth Robinson presented a delightful number.

State Representative Hannah Martin presented the problems of the next legislature before the members. The relief measure, regulation of liquor traffic, the bus and truck law, and a means of raising funds by which the schools of the state might be kept open.

At the close of the session the members were served light refreshments.

Mrs. Elwin Barham was greatly surprised Tuesday on visiting Mrs. N. W. Barham to find a group of friends and relatives who had gathered to present her with a shower. She received many lovely and useful gifts.

Guests were Mrs. Wayne Barham, Mrs. Dora Dewey, Mrs. J. A. Koppohn, Mrs. Elizabeth Kellogg of Portland, Erma Comp, Mrs. Brilla Halbert, Mrs. L. P. Shanaakow of Hillsboro, Mrs. Lena Barham, Mrs. Earl Barham, Mrs. Jessie Barham and Mrs. Wayne W. Barham, and the honored guest, Mrs. Elwin Barham.

## Test Suit at Bar In P. U. C. Fight

H. A. Girod, who was arrested Friday for violation of the P. U. C. tax requirement, will appear in justice court Monday morning at 10 o'clock to enter plea. Girod claims he went to the utility commissioners' office Thursday but blanks were not given to him pending the mass meeting held Thursday. The arrest was made by State Policeman Farley Mogan.

MAN OVERBOARD  
MOUNTAIN VIEW, Oct. 21. — Mark Schneller is suffering from a badly sprained foot and a wrenched back. His injuries are the result of a fall while erecting a silo on the R. W. Clarke farm.

are no outstanding warrants and all bills are paid. More than half of the town is metered and in September 7, 108,380 gallons were pumped, 21 new accounts were opened bringing the total number

of families now being supplied to 378. Members of the water board include Mayor Guy C. Newgent, chairman, Robert Fattison, secretary, Thomas Rapides, clerk,

William L. La Due, superintendent, and Eugene Krebs.

From the modest beginning has grown a great industry that serves humanity with a daily necessity.

## Ford V-8s take first seven places in A. A. A. Race

● Ford V-8 dramatically proved its superiority in speed and endurance, by averaging 80.22 miles an hour for 203 miles—with a maximum speed of 100.3 miles an hour—in the famous Elgin National Road Race for stock cars. The event was run under rules and personal supervision of the American Automobile Ass'n contest board.

Fifteen cars, of four different makes—including the "other two" in the low price field—were entered. Seven Ford V-8s finished in the first seven places. Only one competitive car finished—in eighth place.

Over a treacherous course of concrete, bituminous macadam

and gravel, these Fords took more punishment in minutes than you would give your car in months.

It is much safer and far more economical to travel 60 or 65 miles an hour in a car built to do 80, than it is to travel at the same speed in a car built to do 65 or 70.

**The GENERAL TIRE**

When you think of tires think of Jim and Bill—and the New General. Greater safety, mileage that reduces your TIRE COST—and COMFORT.

The General Jumbo Streamline carrying only 14 pounds pressure is an innovation in tire construction. Let us show you.

**The GENERAL BATTERY WITH PLATE-LOCK**

In General Plate-Lock Batteries, hard rubber keys lock all the plates rigidly in place as if cast in one piece. The plates cannot vibrate and chafe. Plate buckling and short circuiting are substantially eliminated. The result is greater power and much longer battery life.

**Shell "Certified" LUBRICATION**

Shell "Certified" Lubrication follows exactly the specifications of lubrication laid down by the manufacturer of your car. That's why it's the correct method for Your car.
