Liquor Control—4

THE real battle in the special session of the legislature will L be over the method of sale for hard liquors. Prospect of profits attendant on the sale of whiskey is already encouraging private interests to get the wholesale distribution of special brands. They and those looking for retailers' profits will invest the legislature with a powerful lobby to prevent the state from establishing a state dispensary system.

Both the Knox committee in this state, by an eight-tothree vote, and the Rockefeller committee, strongly recommend sale of hard liquors only in state-owned liquor stores. Each contemplates creation of a responsible state commission with a paid executive. This body would have general charge of the licensing of places where beer and wines are sold and through local stores of their own would dispense hard liquors.

The objection voiced to this method by Upton and Steelhammer is that the business should be left in private hands. But the majority report insists:

"The element of private profit, with its attendant temptation unduly to foster and promote sales and consumption to increase profits, should be eliminated entirely from the retailing of liquors of the higher alcoholic content (above 14 per cent). This should be avoided by entrusting such business exclusively to the state, to be handled through the administrative agency recommended for that purpose, and by applying all profits derived from the proper handling of such business to the benefit of the state and its municipal divisions."

The Rockefeller report condemns private licensing for sale of spirits very vigorously. It says in part:

"Its primary weakness consists in the preservation of the private profit motive, which would be threaded through the entire business from manufacture to ultimate local sale . . . A greedy liquor traffic looking only for larger profits will circumvent and evade any system of license defenses which ingen-

'In the second place any licensing system tends to project the whole question into politics and to keep it there. Indeed it compels the traffic to be in politics for self-preservation. The licensing body becomes a powerful political engine. Every licensee and every manufacturer who sells to a licensee, or has any interest in the business, begins to marshal his own political strength to serve his own ends.

"In the third place, a system of licenses to private traders is, theoretically at least, incompatible with any idea of temperance education. While individual vendors of the better class will perhaps from motives of self-interest and conscience join with temperance forces in curbing individual abuse, this is as far as

"In the fourth place, to adopt the license method is to follow the easy path, but it is a path which affords no sure retreat if the system proves unsatisfactory. For the establishment of a licensed liquor trade means the deep intrenchment of a far-flung proprietary interest. This interest would have a large capital investment to be protected at all costs. Buildings, leases, fixtures, inventories, stocks and bonds,--representing millions of dollars -would require defense against those who in the public interest might threaten curb or reduction.'

The logic of the Knox report and of the Rockefeller investigators appears irresistible. Leave the wholesaling and retailing of spirits to private interests and immediately they universe. Without it man would become active in promoting the increase of sales. Political sink into the "dull slavery" of the brain-cells in the mind of the intrigue and corruption are revived. Conscienceless exploitation of weak human beings will follow, as in the saloon days. go on living in a Newtonian uni-

The state has an opportunity now to work out constructives without anxiety as to what we call life, "I have no need of tively a modification of the prohibition policy. Managed Currency

"DRESIDENT lifts currency doubts" was a headline in a I Monday night newspaper. The head writer was more easily satisfied than most everyone else, because confusion of thought has been worse since the president spoke Sunday night. Some commentators hail his speech as a pronouncement for "sound currency"; others hail it as a boost for inflation. It certainly cannot be both.

There is additional confusion over the term "managed currency." The government is opening a gold market; but there is no clear explanation of how it is going to connect a managed currency with the price of gold. And there is even greater mystery over how its control of the currency and fixing of the price of gold will raise price levels. Its previous attempt at raising price levels through psuedo-inflation did not succeed, for it provided no props under the price levels. The secret of price increases through inflation is the prospect of continuing expansion or "uncontrolled" inflation; and this the government opposes.

We must await the working out of the new program to know just what the president has in mind; but at present it appears just another dose of the medicine applied last spring, whose stimulating effects have been passing off during the

In Louisiana some women are said to be fostering a boycott against stores which handle Huey Long's autobiography. Another case of resort to a bad tool. Long's book is undoubtedly "hooey," but to try to suppress its sale by boycott is foolish. Some churches have had the idea of using a boycott against bookstores which sell books they do not like. That is another indefensible attitude. Let the winds of freedom blow; and let the books be sold. Otherwise truth is perverted, suspicion prevails and liberty is stifled.

The Portland Journal sheds copious tears because it hasn't put over the Wolf creek and Wilson river roads under PWA. With the dam at Bonneville Portland would seem to be faring quite well from federal funds. It is getting a public market project from the same source, and road money in addition. The Journal appears to believe that the life of the city depends on being able to drive to the seacoast over a shorter road. The roads will be built, but why pile up pledges on future revenues to get them built?

Al Smith is one rugged individual who can't take it. Al went to Chicago and looked around at the century of progress exposition and remarked: "What you see here is the triumph of the mind and the hand of free men, without dictatorship." Of course Al is just a back number who doesn't understand the new deal. He still insists: "Private industry . . . is still vastly superior to government planning and government control of business and all human effort." Al is wrong of course. Russia proves he is.

And another thing about the Saturday game was the playing of 11 men through the game without a single substitution by Oregon State. The running in of substitutes has made a parade out of ball games, and confuses the stands and probably the players themselves. Coach Stiner demonstrated it wasn't necessary.

Now the retailers are expected to sell goods at least at the invoice cost. When they do that they lose money be goes on just the same. Competition will continue to govern retail Perhaps the greatest mistake made hard, red blotches? cause overnead prices because invoice costs vary; and there are not enough in- by most mothers is that they overspectors to keep up with every store and every sale,

"THATS MY BOY" BY FRANCIS WALLACE

CHAPTER FORTY-THREE

Now Tommy wouldn't have his graduation spoiled by any of his hick relations running over there in tineans like a circus wagon coming into a grand ball or something like that. If Mom didn't go that would settle the whole thing for all the rest of them.

Later that week she got the grandest letter from her boy. He was so sorry she couldn't come and he had been counting on it and she was the grandest mother in the world and he would have been so proud of her; and she was responsible for everything fine which had ever happened to him and he would never forget her or be able to repay her no matter how he tried.

Mom cried when she read it and that night she read it again and put it under her pillow and just laid there a long time and thought of things. Just that letter was worth the disappointment of not seeing her boy in all of his glory; Mom knew now how much she had wanted to go . . . how she had looked forward to every little detail of it.

But she had gone a long time without seeing a Thorndyke graduation and like as not it would have been disappointing anyhow . . and it would pass away and she'd forget it like everything else.

But that letter would never pass away: she would keep it always and read it over and over when her Tommy got even greater than he was. new stuff, colored ware and all don't hear me blabbering all the

And the next day she let Mrs. "Yeh-but you don't expect that Johnson read it and Mrs. Johnson shrimp Joie Farrell to think up cried when she read it; and Mrs. anything, do you?" Will you experiment ONE WEEK to be RID of Constipation

FOR LIFE?

Can constipation be overcome? "Yes!" say medical men. "Yes!" say thousands who have followed

their advice and know. You are not likely to cure any case of constipation with salts, pills, tablets, or any habit-forming cathartic. But you can correct this condition by gentle regulation with a suitable liquid laxative.

> Why Hospitals use a liquid laxative

The dose of a liquid laxative can be measured. The action can be controlled. It forms no habit; you need not take a "double dose" a day or two later. Nor will a mild liquid laxative irritate the kidneys.

perfect movement, without any discomfort at the time, or after. The wrong cathartic may keep you constipated as long as you keep on using it! And the habitual use of irritating salts, or of powerful drugs

The right liquid laxative brings

in the highly concentrated form of pills and tablets may prove injurious.

What is a Safe Laxative?

In buying any laxative, read the label. If it contains one doubtful drug, don't take it. If you don't know anything about a prepara-tion, ask some doctor about it. Temporary relief that you get from some habit-forming cathartic is very apt to be dearly bought.

Dr. Caldwell's Syrup Pepsin is a prescriptional preparation with its ingredients stated on the label. By using it, you avoid bowel strain. You can keep the bowels regular, and comfortable. You can make constipated spells as rare as colds.

Make the LIQUID TEST:

A week with a properly prepared liquid laxative will prove to you that you are on the right track. A few weeks' time, and your bowels can be as regular as clockwork. The secret is the right laxative, and the right dose. A laxative you can measure out, and reduce the dose as the need for help is reduced. Dr. Caldwell's Syrup Pepsin is an approved liquid laxative which every druggist keeps ready for use.
