Ten Best Films

THE Oregonian has been making a poll of the ten best plays of 1933. We didn't know there were that many. Privately speaking we think the best one was Barbara Stanwyck in "Ever in My Heart",-that's the one we saw in 1933. We are fortunate because we can see all the plays by proxy, with old man Talmadge to come in and report. He's a good critic too; he saw the Cherry sisters forty years ago.

The Ogn poll shows "Forty Second Street" as leading. For second place there is a tie between Mae West's "She Done Him Wrong" and "Cavalcade". Hold on there; we saw "Cavalcade" only it seems like a year or more ago. "When Ladies Meet" is in the tie for second place too. Following in order were "Be Mine Tonight", "The Animal Kingdom" "Rasputin and the Empress" (we didn't like this one) and "Strange Interlude" (this one was good, in our opinion).

Trailing along were: "The Private Life of Henry VIII", "A Farewell to Arms", "I am a Fugitive From a Chain Gang", "Lady for a Day", "Maedchen in Uniform", "Silver Dollar" and "State Fair".

The year isn't over yet. Here comes "Little Women". "The Three Little Pigs" is showing now to crowded houses. When the year is over we'll have the "Sage of Salem" pick the ten best as he rates the performances of 1933.

Are Banks Done?

WE commented the other day on the "passing of the country bank". The real question is not whether the country bank has seen its day, but whether all banks are not "done". The way the government is getting into the credit business one wonders if there will be any place left. for privately owned and operated banks.

Already the government has credit agencies of various kinds. There are about 57 varieties of banks for agriculture. We see two new banks are being started at Spokane now by the government agency: Production Credit corporation, and Bank for Cooperatives. The government is getting in the home loan field fast. It is supplying credit to railroads, private industries, and to public units, doing it of course with borrowed money supported by the credit of the United

Socialists of course want the government to keep on until it owns and runs not only the banks but all the industries. Apparently it is going to keep on till its credit runs out and then there will be a big smash-up. You can't trust a government which repudiates its obligations and deliberately depreciates the value of its currency. There is an immoral black mark there which the government can never erase.

In war it is observed that for every new and more powerful piece of artillery a new and heavier armor plate is made for defense. The rule seems to work in crime. Police have been aided greatly by use of the short wave length radio sets. Now we read of how bold bandits in Chicago broke open safety deposit boxes and took with them a receiving set so they would learn if a broadcast was sent out to round them up. It takes constant vigilance to combat the criminal mind.

Americans will welcome home the flying Lindberghs. They have been away long enough; and people are nervous when they know they are on long flights. Accidents are always possible even to as careful an aviator as Lindbergh. Charles and Anne have had an interesting trip ranging from Greenind to Brazil; but the home tolks will be happy and relieved when they get to flying in domes-

A. C. Townley, of non-partisan league fame, is attempting a comeback in North Dakota. We are susprised at his modesty. He should go to Washington where he is needed in the efforts to townleyize the whole USA.

Luke May, now chief of detectives in Seattle, got his man before he did his stuff, when he secured arrest of a chap plotting a kidnaping. It begins to look as though the racketeers will have to look up some new form of deviltry in order to get easy money.

MANY HEALTH inquiries come from persons in all walks of life. Hardly a day passes that I do not receive letters from young boys and girls, most of them requesting

common skin disturbance called "acne". Acne is an inflammation of the giands of the skin. It isually afflicts the young shortly after they have reached the age of puberty.

skin complaint of Dr. Copeland adults, too, particularly if they

are careless about their personal hygiene, diet and other health habits. The affliction is characterized by small pimples and blackheads. These are found on the face, shoulders and back. The skin is greasy and has an unhealthy pallor. As a rule, the pimples become infected, and, if untreated, may disfigure and permanently scar the face.

Glandular Disturbance Though the actual cause of acne never has been discovered, it is probably due to some disturbance of th glandular system of the body. Many authorities believe that the disorder is caused by a germ called "bacillus acnes". This germ has been found in many cases of acne. But another germ, "staphylococcus aureus", is commonly associated with those cases

where pus forms in the pimples. Since infection plays a role in this disorder it is important that the victim of this disturbance have his teeth, tonsils and nasal sinuses examined to be sure no infection is present. Diet and proper bowel elimination are especially important in the correction of this annoying skin disturbance. I would advise all of my young readers suffering acne to avoid starchy and sweet foods, such as candy, cake, pastries and puddings.

This may prove to be a hardship. But you will be delighted with the beneficial results from this simple rule. In addition, coffee, tea, cocoa and stimulating beverages should be avoided, as well as fried foods, gravies, spices, nuts, smoked and

Use a Bland Soap

I am often asked what treatmen advise for an irritated skin and what soap is most beneficial. It is best to use a soap that is bland and free from all strong chemicals. The face should be carefully cleansed with warm water and soap at least twice a day. The blackheads should be removed with a blackhead extractor, which can be purchased at any drug store.

Never squeeze a pimple, and above all, remember that if pus is present, the pustules should be opened by a physician. Cases of acne are successfully treated by X-ray, but this form of treatment should only be decided upon by your physician. Do not become discouraged. Persistent care of the skin and attention to the diet will lead to the clearing of a poor complexion and the cure of

Dr. Skiff had known F. W. Ish erwood, the only one of the party presumed to be alive, and wrote him. This is his reply:

This is very inter esting to me personally.

"While on this trip, at each and every camp that we struck, I carved the date and the names of the party on a tree near camp, so there must be a great many of such marked trees, but this is the first I have ever heard of any of them having been found. It was certainly a very interesting trip of long duration and our discoveries in lakes and many other interesting things were taken down by each of us in our diaries that it was necessary for each of us to keep. At the end of the trip these diaries were turned over to Judge Waldo with the understanding he was to write the history of the trip. However, this he neglected to do in so far as I have been able to find out. Since his death I have personally taken this up with his widow, Mrs. Waldo, several times, and she explained that she still had them in safe keeping and that she intended to have them printed in book form such as the Judge had made notes of. However, since her death, I have heard of nothing further from tainly have made very interesting be a faint chance of a successful the diversion. The hostess was as-
