ATTENTION TO BAR ASKED BY ROSSMAN

A plea for the shedding of public indifference and the erroneous idea that whatever the bar presents must be opposed to public welfare, was voiced by Judge George Rossman in an address to the Credit association yesterday on "Improvement in Rules of Judicial Procedure."

He urged particularly that the public look forward to and study the recommendations to be made within the next few months by the committee of 17 which is now studying Oregon civil and criminal laws procedure with a view to recommendations for reform.

Present day criticism of the court, and slow and expensive movement of justice is nothing new, Judge Rossman declared. To show how old is the cry against law, he gave an interesting historical sketch of opposition to the profession, both in England and in this country, and showed how legal science advanced progressed from the ancient days of ceremonial trial, in which God was supposed to reveal his judgment, to the present.

Law as known today first began to evolve in the 16th century, when young men entered the study, and practice, much to the opposition of the clergy, which had been judge and jury to that time.
