

# BOARD DEFINES COLLEGE SETUP

### Kerr's Recommendations on Setup are Ratified by Education Group

(Continued from page 1)  
Federal CWA money would be available for carrying out physical plant repairs and improvements. As this would, if true, largely relieve the next budget of carrying repair funds, he asked that the allowance of board funds to purchase materials be increased again to \$15,000, which was done.

The new administrative plan as adopted is based upon the state board as being in supreme control of the entire state system and the chancellor as the state's chief executive officer and directly responsible to the board for administration of its program and for coordination of the several institutions and divisions.

Next the acting presidents are responsible to the chancellor, each for the administration of his own institution, and finally the inter-institutional deans and directors are responsible directly to the chancellor only for cross-campus functions, and to the respective acting president for functions applicable to a single institution.

# SMALL-TIME KIDNAP EFFORT IS CHARGED

(Continued from page 1)  
The officers said they were told Cornwall was not at home, but found him hidden in a closet. Landsbury was arrested at a lumber mill where he is employed. The officers made the arrest from descriptions given by Bowles and a clue afforded by Clay Kirk, who said he recorded the car number on general suspicion when it passed through Albany last night.

The two are charged with violation of the state kidnaping statutes. Whether a federal charge will be placed will probably be decided Thursday when the Lin county district attorney returns and preliminary hearing is held. State police officer Walter Winters said Cornwall served a term in the Oregon penitentiary for larceny and that Landsbury had been paroled from a penitentiary on a statutory charge.
