## New Deal for England?

TUROPE has been watching our NRA experiment with Linterest, sometimes amused, always keen. Exporters report that their correspondents abroad are quite alert to the substitution partially at least of planned for individualistic economy. England accustomed so long to "laissez faire", free competition, has been very skeptical of the suc-- cess of the American venture. Yet in England some of the party leaders have been pointing the way toward planned industry.

A subscriber has sent us a page from "John Bull", British weekly, with an article by A. G. Gardiner. He makes note of the shift to integration of industry under state direction though not state ownership or operation, endorsed by those who say that the day of competitive industry is done. But Mr. Gardiner expresses the view that it is government subsidy as well as bad general conditions which crippky British industry today. He cites the Japanese subsidy of their industries. American subsidies to shipping, and those of France. Italy and Germany. Then with the characteristic conservatism of the Britisher he concludes:

But, while appreciating all this, does it follow that the State control of industry is the right reply? It is the State subsidies, more than the State control, which do the mischief, and I cannot conceive that any Government will enter on the fatal expedient of spoon-feeding industry out of the taxpayers' bowl. If one industry is fed, all would have a claim to be fed, and the end would be bankruptcy. Nor do I think that even America will be able much longer to finance this mad form of compe-

"Sooner or later the plague of Nationalism will pass and the business of the world will return to a business footing. Then the country which has refused to gamble with its finances in order to get business that doesn't pay will come out on top. And do not let us forget that, bad as things are, we have so far weathered the storm better than any country in the world.

"This does not mean that there is not much that the State can do to combat the attack on British commerce, But it does mean that we should not plunge into a grandiose 'planning' revolution of British industry without the gravest examination and the utmost proof that we are not leaving the frying-pan for

A few weeks ago we heard a Canadian publisher say,-The United States ended 25% of its unemployment by means of NRA; Canada, without NRA, put 37% of her unemployed back at work." We think both figures are exaggerated. But the present indication is that England and Canada will attempt to "muddle through" as they did the war, without resort to expedients which this country is employing.

## Columbus Rides Pinto

THE Yakima Republic told recently how Columbus came L to that inland city on Pinto, making local history which an enterprising reporter set down in this fashion:

"Columbus arrived at the Yakima city jail last night and promptly fell down upon his knees, but not for the same reason that his namesake knelt on the shores of the new world in 1492. However, Yakima's Columbus had been through a stormy and liquor-soaked evening, and any port was welcome to him.

"Judge John H. Lynch surmised in police court this morning that Billy Columbus, Indian, came to town on Pinto. as well known in the west as a horse's name as well as the name of a ship Christopher Columbus used. The Indian was fined \$25

for drunkenness. "The judge offered to let Columbus out in time for salmon fishing, if the defendant would be good. The latter said the redskin equivalent of 'Hey?' and cupped one dirty hand behind his ear. Lynch fairly shouted the offer. Columbus dug shaggy black hair from around one ear and listened intently, but still looked

"Carl Perry, clerk, who has a larger sounding board than the judge, took up the shouting. Prisoners in the basement tank, two floors below, thought Perry was going on a fishing trip. The judge and the clerk subsided, agreed hoarsely between themselves that Columbus either had 'dehorn' in his ears or else didn't want to hear an offer of work, and let the matter slide."

Well, friends, here we are right back on the gold standard. True, we are on a lower limb; but it is the yellow metal standard. After experimenting with the rubber dollar the president decided to stay by gold. That is some comfort to hard money cranks like ourselves. But the argument isn't settled. The next time the people ose their heads in speculation and then have the inevitable headaches the old speeches against the gold standard will be revised and used. Scarcely a single utterance on the money question in the late controversy was new. Most of the arguments had been made in preceding periods of crisis for hundreds of years.

Europe, where she had gone fellowing her father's death, young and beautiful Stanley Paige became bored and returned to New York to find the "something sort of sweet and important" which she felt she was missing. Stanley finds Perry Deverest, handsome young lawyer, still as much in love with her as ever, but her own heart is untouched. She longs for someone to love — someone to really belong to. Then she meets the fuscination Drew Armitage. It is love at sight. Drew's most recent heart had been sophisticated Dennis St. John. In: breaking with her, he said: "You know, Dennis, you're a lot like me -you know when a thing is ended and you accept it - gracefully." Marcia Wingste invites Stanley and Drew to a dinner party. Ned Wingste informs Stanley that the latter's lawyer, Charles Carleton, has been playing the market heav-ily and wonders if her funds are intact. Stanley's thoughts are all of Drew and she pays little atten-tion to what Ned is saying.

### CHAPTER BIGHT

"It was a nice party, Drew." Stanley let her silver cloak slide into his arms, went on into the drawing room. There was a tray holding a small decanter, glasses and thin crackers waiting for them. # VEW OBSTACLE HIT IN PEACE PROGRAM

(By the Associated Press) Formidable new objections to concrete plans for European disarmament crowded to the front last night as France flatly rejected Germany's offer of nonaggression pacts.

Paris likewise extended a cool eception to British and Italian disarmament plans which recognized Germany's claim to equality in armaments. A French note addressed to Chancellor Hitler accepted none of his recent pronosals, but left the door open for future conversations.

League of Nations circles in Geneva, however, saw in the Britiish and Italian memoranda some hope for bridging Franco-German differences.

Berlin's attention was occupied with a reply to a recent protest from Austria concerning nazi interference. Germany denied, point for point, Austrian accusations.

Acceptance of a code and further outlining of plans for the canvass of Salem employers now under way occupied the major portion of the meeting of approximately 100 unemployed women and girls at the home of Mrs. Mary Butler, 268 North Liberty street,

last night. Adopting the name "Women's Square Deal league," the group announced as its code: "The aim of this group of women is and alsightly condition is the camp- ways shall be conservative and constructive. We ask no special favors from anyone, but an equal distribution of such work as is now available."

The group, not yet fully organized, claims that women and girls who are not absolutely dependent upon their jobs should give way to those who are and that employers who believe in the "square deal" will recognize this and acquiesce. The date for the next meeting when officers will probably be nominated has not yet been announced.
