ECLIPSE WILL PLAY TO EMPTY GALLERY

6000-Mile Path is Almost Unin bited but Some **Groups Will Watch**

YOKOHAMA, Japan, Feb. 12 .-(P)-The sun will stage one of its rarest and most awe - inspiring spectacles February 14 — February 12 to you in America - a total eclipse, but it will be playing to an almost empty gallery.

It would be difficult to trace on the globe any arc of equallength that would touch less of the habitable portion of the earth than the 6000-mile path of this eclipse across the heaving waters of the Pacific ocean.

It will start in the seas 200 miles east of the Malay peninsula, where it coincides with the sunrise; and although it will be visible for many of the islands of the Celebes and part of Borneo, the morning mists will handicap any attempt there at scientific obervation.

Sweeping across the Pacific it will miss the Philippines, Guam and Hawaii, plunging into the sea with sunset about 200 miles off

The nearest American territory to the main show will be tiny Midway island, west of the Hawaiian group, but even Midway lies a little outside of the 70-mile-wide path of totality.

The gallery, however, will not be quite empty, for an expedition of American and Japanese scientists sailed from this port January 15 for Losap Island, a small coral atolf 1875 nautical miles to the southeast, which provides the only suitable spot for successful scientific observation and picturing of the phenomenon.

As Gay Parisians Rioted

The usualty placed Place de L'Opera in Paris is the scene of wildest disorder as rioters vent their anger against the government on everything breakable in the vicinity. Here a mob is over-turning a klosk that was converted into a bonfire. Inability of police to cope with rioters resulted in calling out troops, who fired on mob, killing a score and wounding hundreds.
