Interesting Facts...

H. A. Gwyann, local barber and his wife both celebrate their birthday today.

A new oak fountain top, beautifully finished in green to harmonize with the general color scheme of the restaurant, was installed at the Spa yesterday. Frank Myers and Frank Brown, the proprietors, are especially proud of the fact that the counter was made and installed en-

___0-Square tub Maytag aluminum washers, recently offered to housewives at lower prices, now have been introduced in new models at the lowest prices in the history of their manufacture.

This announcement was made today by Mr. Geo. M. Self. manager of the Hogg Bros. at 456 State street, local Maytag dealer. The new Maytags, greatly improved over former models contain many features never before offered on washers at any price. Included among them are the new

four-point tension roller water remover, new reinforced cast aluminum tub, and monoform base. The new models continue to use the gyrator principle of washing originated by Maytag and retain other Maytag features already familiar to housewives," Mr. Self

"The Maytag factory at Newton, Iowa, the largest washer factory in the world, is at present employing more men and turning out more Maytag washers than at any time in its history. The national re-employment program, which of course has the Maytag company's hearty support, has made it possible for that company to employ more men than at any time heretofore. This means that their higher production makes it possible to give the housewife more for her money. There is a definite trend toward higher quality washers,-not because housewives want to pay more, but beand most economical thing to do." Mr. Self recently received in-

formation that he should expect a price advance on Maytags by the 25th of this month. We heard this column referred to yesterday by a jealous columnist as an ad column. Not so. You'll find many scoops and facts of in-

terest here which are generally

missed by ordinary news hounds.
