TREATMENT FOR PEA

Treatment of early planted garden pea seed with Semesan, an organic mercury compound, has been found to insure a markedly higher germination and increased vigor of the plants, in experiments carried on by the vegetable crops department at Oregon State college.

Poor germination of peas planted in cold, wet soil in spring, or subjected to such conditions after planting, is caused mostly by rots induced by molds. Even where the plant is not entirely destroyed, the growth may be seriously impaired, say the experiment sta-

tion specialists. and moisture showed that the avunder unfavorable conditions was 90 per cent compared with only

The treatment is simple and economical, costing only about a cent for each pound of seed where large lots are treated. A small quantity of the dust equal to seven times the size of a pin head is enough for the ordinary 10 cent packet of seed. Seed and powder are shaken together sev-

Tests carried on under controlled conditions of temperature erage germination of treated seed 28 per cent among the untreated lots. Later growth records showed the treated lots to average from 100 to 350 per cent better than

those untreated.

extension dairyman at Oreas the Executrices of the last will and testament and estate of Ra- gon State college, has been called chel C. Harritt, deceased, and that to Washington, D. C., for three said Court has fixed Tuesday, the months to serve as regional con-13th day of March, 1934, at the sultant in launching the plans for hour of ten o'clock A. M. of said a dairy production control proday, as the time, and the County gram. Morse has been given a Court Room in the County Court leave of absence for that period Borrego's Car Market House at Salem, in Marion Coun- from the extension service and will return here following his spety, Oregon, as the place for hearing said final account and all ob- ciat work for the federal govern-

PLANS FOR DAIRY CONTROL ARE TOLD

Preliminary Word is for Alletment of 85 Per Cent of Past 3 Years

Removal of the minimum limit in the hog section of the corn-hog control plan, establishment of farmer exemptions under the hog processing tax, and outline of the entative plan for dairy production control are late developments under the AAA, according to a review of the agricultural officials at Oregon State collège.

The recent address by Secretary acted much better although re-Wallace on "The Dairy Dilemma," contained the first authoritative explanation of the kind of production control contemplated for dairying by the AAA. Even it is still tentative, however, as to details, hence there is still time for it to be carefully considered by dairymen throughout the country looking toward possible changes or additions before the final contract forms are arrived at.

The plan proposed by Wallace calls for an individual voluntary farm allotment amounting to 85 per cent of the average annual production of each dairyman over the past three years. Thus, cooperating dairymen would agree to reduce production 15 per cent under the base period.

Tax Oleo Also For such reduction, to be made by any plan they saw fit to adopt. they would be compensated by adfustment payments to be financed from a processing tax on butterfat which would reach a maximum of five cents per pound, with a compensatory tax on oleomargarine. As substantial an advance payment as possible would be made to each dairy farmer soon after his contract is accepted.

Secretary Wallace promises to keep the plan as flexible as possible so as to permit expansion of the industry as fast as consumer demand warrants. There are other angles of the plan about which more will be announced later. Limit is Reduced

The change on the corn - hog plan allows any grower of hogs to join and receive benefit payments in return for reducing his production by at least 25 per cent. Previously an average of three litters a year was the bottom limit necessary before a man could sign a hog contract. This change is expected to increase the total Oregon sign-up very materially, as most hog raisers in this state are relatively small producers.

The change in the hog processing tax allows each farmer an annual exemption of 300 pounds of pork products he sells or trades from slaughterings of hogs of his own raising. This applies only where his total sales of products in any marketing year do not exceed 1000 pounds.

Tel. 5832. Treats both acute and AUTOMOTIVE ISSUES lets, programs, books or any kind of printing, call The Statesman Printing CHIEF, SPECULATION

NEW YORK, Feb. 21.-(P)-Imminence of a holiday and persistence of the general mood for caution which recently had characterized trading kept stocks with

narrow bounds today. Low priced issues, mainly repesenting the automotive industry, still held the speculative floor. Turnover in several of them was substantial though gains were largely fractional. Old time favorites loafed along drowsily, uninspired by activity in the currently popular issues. Some of the former roused a bit during the plain, hop baskets, hooks, logan hooks. Salem Fence and Stove Works, 262 Chemeketa. Tel. 4774. R. B. Fleming. Closing prices showed small changes, the averages being up three tenths point in a turnover of 1,-899,920 shares.

New York Central reacted when the new financing plan was announced, but held above \$40. which is the first conversion price for the proposed bonds. American Telephone was very quiet both before and after the regular dividend was announced, for such acwarding and storage our specialty. tion by the directors had been widely expected. At best the shares were up nearly a point; they closed a shade lower. North American's dividend in cash-the company had previously paid in stock was accompanied by word that the directors thought, "while present conditions continue" part of the earnings should go to stockholders rather than all the available income should be invested in the business as heretofore.

college experiments may be had MOVE TO LARGE FARM RICKREALL, Feb. 21. - Mr. and Mrs. Tom Dulaney moved onto their farm near Hopewell Monday. He plans to farm on a large scale, there being more than 300 acres in it. The Duon Dairy Control laneys have resided here for the past two years.

Producer May Now Market 300 Pounds of Products in Year Without Tax

On November 22, 1933, the bueau of internal revenue issued a release in which it was stated that the producer who slaughters his own hogs and sells or otherwise disposes of any part of the products is subject to the processing tax on the portion sold. Commissioner of Internal Rev-

enue Helvering now calls attention to the fact that ruling has been changed. Under regulations just issued by the secretary of agriculture, approved by the president, the producer of hogs may sell or exchange during any marketing year not to exceed 300 pounds of products derived from hogs slaughtered by him without payment of any processing tax. The producer in this instance means the owner of the hog at

time of farrowing. If the producer processes hogs and sells or exchanges during any marketing year products derived therefrom in excess of 300 pounds but not in excess of 1000 exemption on 300 pounds, but shall pay the processing tax on the amount sold in excess of 300 pounds. He is not entitled to any exemption if he together with his own family, employes or household, processes hogs produced by him and sells or ex-DALLAS - A six - year - old changes more than 1000 pounds walnut tree can have a root of the products derived theremore than 50 feet long.
