BUTTER STOCK CUT **DURING FEBRUARY**

Butter stocks in storage in the United States on March 1, as reported by the federal bureau of agricultural economics, amounted to 36,842,000 pounds as compared with 75,995,000 pounds February 1, 1934, and a 5-year (1929-1933) average for March of 23,187,000 pounds.

Stocks removed from storage in February, 1934, amounted to 39,153,000 pounds, which were slightly greater reductions than occurred in January, 1934. Of these total removals in February, 22,022,545 pounds represent government reductions from storage for relief purposes, and 17,150,-435 pounds represent the amount removed by commercial agencies.

The net commercial removals in February, 1934, of 17,150,455 pounds compare with 6,253,000 pounds net commercial reductions during February, 1933, and a February net commercial reduction for the 5-year average of 11,235,000 pounds. During February of this year the government removals of butter from storage increased and commmercial removals declined compared

with January of this year. Of the 36,842,000 pounds of butter in storage as of March 1, a total of 4,114,404 pounds belonged to the United States government. This butter is rapidly being distributed by the Federal Surplus Relief corporation to the needy and unemployed. Up to March 1, government purchases for relief purposes totalled 50,-131,437 pounds, of which 2,072,-000 pounds remained to be delivered on March 1. Of the total quantity purchased, 43,945,033 pounds had been distributed through relief channels up to March 1.

BOSTON, March 22. (AP)-(U. S. Dept. Agr.) - The wool market in Boston was very quiet. There was not enough business transacted to establish a market. Nominally, quotations were unchanged from last week. Some houses were willing to make slight concessions from recent asking prices on odd lots and inferior wools. Most holders of substantial quantities of good wool were inclined to wait for a demand to develop. meanwhile firmly adhering to asking prices.
