Propaganda Lecture Tuesday Night at Auditorium

USING illustrations of propaganda from the World war from the Roosevelt administration, and from the Hitler regime in Germany, Professor M. E. Bonney, who speaks Tuesday night in the auditorium of the chamber of commerce under the auspices of the Salem Arts league, is expected to give an exceptionally interesting and informative address. His specific subject is "Principles of Propaganda in Influencing Public Opinion."

With Soviet Russia and Nazi Germany pouring propaganda into the United States in an effort, not only to create a favorable opinion but also to demoralize the government, information enabling the average person to detect this propaganda is declared to be of great social importance at the present moment, according to Professor Bonney.

He expects to show how complex problems are reduced to one major point, using slogans, personifying the issues, reducing a situation to an absurdity, and distracting the attention of the public from important to unimportant and harmless matters. These points, he expects to show, are used in political campaigns and in other campaigns to mold the trend of public opinion.

Professor Bonney has made this subject the theme of his Ph. D. thesis at Columbia university and he has spent much time in research to make it complete and exact. He is said to be an entertaining speaker, and it is expected that a large group of Salem citizens who are interested in this subject will be present to hear him.

This program is presented by the Salem Arts league as a special mid-summer event, and is free to all.
