Black Cherry and Prune Buds Dead, Dropping, Report

Many orchardists are reporting that buds on their prune trees and black cherry trees are dead and dropping off according to S. H. Van Trump, horticulturist. He attributes this loss to heavy cold rains which the valley experienced early this spring. Van Trump says the blossoming of trees is very backward with the outlook for the peak of the blossom season to be reached late next week.

Few reports of trips have been made by growers in the Salem district, Van Trump says.

Summer Gasoline

WHEN the weather's warm around town, and the sun's blazing down on vacation highways, you need a gasoline like Summer 76—which brings you these three important qualities:

1. HIGH ANTI-KNOCK—for smooth, flexible power, fast acceleration in traffic and on the grades, and a cool-running motor.
2. ABSENCE OF VAPOR-LOCK (the fading and spluttering that sometimes occurs on hot days). Each of the five different altitude and temperature zones of the Pacific Coast receives a grade of 76 especially adapted to the climatic conditions of the area. (A map showing these "zones" is included in the "Trip Record" obtainable from any 76 dealer. See details at left.)
3. MAXIMUM MILEAGE—for thrifty motoring. 76 now contains more of the heavy, power and mileage-giving fractions for warm weather driving—and, in addition, retains the quick-starting and anti-knock leadership for which 76 is famous.

Start now to get MILEAGE YOU CAN MEASURE with Summer 76. You'll find it at thousands of independent dealers and all Union service stations—at no extra cost. Watch for the big 76 banner.
