The board at a special meeting yesterday afternoon cleared some legal technicalities to make way for the bid call. It is planned to sell \$100,000 worth of district notes and with the money received to redeem the \$95,000 worth now outstanding. The directors hope the new issue will go at interest much lower than the 5 per cent now being paid.

Same Ad Style Used — An advertisement more than a quarter of a century old, advertising chewing gum for the Wrigley company, is printed in today's Statesman. It first appeared in 1910. The appearance is said to set a record for the current use of an early ad. That a message simply and truthfully presented never loses its newness, is the principle back of the Wrigley company's decision to revive this advertisement. The 1935 ad was exactly like today's in design and wording.

By Choice Final — When common carriers and contract carriers elect to pay their taxes upon the basis of per ton mile, they voluntarily subject themselves to the provisions of law applying to such operations and preclude themselves from claiming the benefits of provisions applying to those who elect to pay upon the basis of gross receipts. CANNED GOODS NOT IN HEAVY DEMAND

Uncertainty About Trends Cited by Paulus; Plant Moving Not Decided

Eastern buyers of canned goods, uncertain about the trend of prices, the size of the 1935 pack and about such political factors as the continuation or suspension of NRA codes, are showing little or no interest in making commitments for the new pack of vegetables and fruit, according to Robert Paulus, president of Paulus Bros., who is here for some time from his home in New York City.

Because of the extremely dull market, canners thus far are at a loss to judge the demand for this season or the prices which will obtain. Paulus said the only sales being made were for the carryover of the 1934 pack, which he said was being sold at extremely low prices.

Wholesalers and retailers of canned goods have found a stiff resistance on the part of consumers to the higher prices which became effective last fall, Paulus said. As a result goods which the packer moved out at a fairly satisfactory price then has been hard for the distributor to sell. The public is very sensitive to higher food prices and exhibits a marked tendency to do without higher priced goods or to buy cheaper grades, he reported.

Mr. Paulus has been spending a considerable proportion of his time in Washington, D. C., as a member of the managing executive committee charged with administering the canners' code. He said the future of the code was uncertain as no one knows what congress will do now that congress has adjourned. Paulus said he hoped the code could be continued at least in regard to minimum wage provisions.

Asked if the Paulus Bros. operations might be moved to Portland this year, Mr. Paulus said he had not had time to confer with his brothers here on that matter since his return. He said Portland interests were insistent the plant be moved to that city and had made several propositions. "We do know what we can do with the plant here and we know the local conditions," Paulus indicated. "That may affect our decision at least for this year."
