Liberty District Also Has Berries Cut Due to Heat

LIBERTY, June 11.—The much needed and hoped for rain has so far failed to materialize for the benefit of hay crops, strawberries and gardens in general. Strawberry growers state that the strawberry crop will be quite materially cut short due to drying up of the smaller green berries which will not reach maturity due to heat and dryness of the soil.

Some of the later fields sown for hay also need a thorough soaking in order to produce a fair crop. Some of the early fields are showing an excellent stand of grain.

1000 Start 4-H Summer Course

CORVALLIS, Ore., June 11.—(AP)—The largest 4-H club summer school ever held in Oregon got underway yesterday at Oregon State college.

With registration still incomplete, nearly 1000 were signed with all but one county of the state represented.

Water Shortage at Scio Causes Three-Hour Limit For Irrigation Purpose

SCIO, June 11.—An ordinance providing for the refunding of Scio's \$10,000 bonded indebtedness was adopted at the June meeting of the town council. Approval of the legal formalities by the Seal concern of Portland, which handles such propositions in procedure such as Scio has entered, will conclude all preliminary arrangements, according to E. D. Myers, city treasurer.

The matter materializes as initiated, the bond payment will extend over a period of 20 years, beginning September 1, 1935. The sum of \$500 is to be paid each year in two equal installments March 1 and September 1 for 20 years, the rate of interest being five per cent. The rate now paid is six per cent, and the amount due each year on the first of March is \$2000, under the obligation entered in 1920.

While all of the present bondholders have not consented to the refunding proposal, it is believed there will be no serious difficulty in bringing this about.

Water shortage in Scio presented a serious problem for the council, as a result of which emergency ordinance was adopted, restricting sprinkling and irrigating to three instead of six hours per day. The fee likewise was reduced to 50 cents instead of one dollar per month. The water superintendent, J. F. Cupor, was instructed to notify all water users to this effect and of the penalty of one dollar for violation. Irrigation periods were set at 6 to 7:30 each morning and evening.

Steps immediately to ascertain the extent of the city water supply source were taken by instructing the proper committee to get in touch with the company which drilled the 205-foot well four years ago and have its present capacity inspected. If the supply is sufficient, a new pump for greater efficiency will be considered. No water was available on several occasions within the last week, thus subjecting property to fire hazards and depriving citizens of water for domestic purposes.

Feasibility of combining the positions of marshal and water superintendent was considered with a view of securing better service.

Mrs. W. D. Henry, grange master, conducted a round table discussion of matters of interest to the grange which preceded lunch served by Mrs. John Simmons and Mrs. Audrey Ewing. The July and August meetings will be held in the community grove.
