

Prepare For Hot Lunches

Woman's and Community Clubs Are Joint Sponsors

LIBERTY, Nov. 21.—The school hot lunch committees from the Liberty Woman's club and the community club met recently and planned the work for the project. Mrs. R. L. Forster is in general charge and will also prepare the menu. Mrs. W. Westenhaven will act as secretary-treasurer and Mrs. C. W. Stacey will have charge of the milk supply for the cocoa and chocolate.

Those donating vegetables are asked to have them ready next week. Cars will call at each place, pick up donations and bring them to the established commissary. Mrs. C. Sargent and Mrs. Murhammer will gather up the donations on the west side of Liberty highway and Mrs. Mason Bishop and Mrs. Forster will take those on the east side. In addition to vegetables other items were used. The cook being provided by the re-employment bureau through federal funds, is to be here ready to start work December 1. The project is to last three months. Should kitchen space not be ready in the new building temporary cooking facilities will be set up in the schoolhouse basement.

Take New Members
The local Girl Scout troop met at the schoolhouse Monday after school with the new leader, Miss Marie Behrens, in charge. It is the new "Woman's Recipe" bread

... it will reach you always **FIRST-DAY-FRESH**

A MESSAGE FROM *Julia Lee Wright*
Head of one of the world's largest Home Economics Bureaus

A WOMAN'S RECIPE MAKES A WORLD OF DIFFERENCE
Yes, this new bread is amazingly tender and delicate, far more flavorful—thanks to the hundreds of Western women who helped perfect it. It's a woman's idea of good bread.

WOMEN FIND ORDINARY BAKER'S BREADS MUCH ALIKE
Not unpleasant to taste—simply uninteresting, flat. These breads, women think, must be baked to men's ideas. To chemical formulas so standardized there's nothing exciting about them.

BUT BREAD IS MOST APPETIZING WHEN FRESH
In fresh bread, the tiny cell walls are soft, tender—rich in the "flavor factors" which make the loaf fragrant, good to eat. These cells become brittle, crack as bread turns stale.

GUARANTEE

If you do not agree that this new "woman's recipe" bread tastes better your grocer will refund your money.

The chemists' tests show that even finest waxed wrappers do not guard this precious tenderness. It disappears—and lets flavor escape, too—when bread stales.

So we make sure this "woman's recipe" bread is First-Day-Fresh when you buy it!

Each loaf, each day, is dated fresh. A special "time-clocked" band on the wrapper tells the day each loaf is fresh. Fresh loaves are delivered to your grocer each morning—and "stales" unsold from the day before picked up.

Notice these Freshness Date Bands

SO WE'VE ASSURED FIRST-DAY FRESHNESS
Right at the bakery, a "time-clocked" wrapper band like this goes on every loaf of Julia Lee Wright Bread. It states the day on which the loaf is fresh—And also that the loaf cannot be sold as fresh after midnight of that day.

on the loaves of Julia Lee Wright Bread at your grocer's today. And notice, too, the extra taste-pleasure your whole family gets from this new "woman's recipe" bread!

FOR SALE AT YOUR NEIGHBORHOOD GROCER SAFEWAY STORES

MANY hundred Western women helped to create it—a bread really different from "baker's bread!"

For months housewives compared recipes—judged many thousand loaves. Then they told us the kind of bread they hoped to find in stores.

And the result? A change in bread making. A loaf women agree "eats" better... for two reasons.

A woman's—not a chemist's—idea of good bread

Men bakery experts, we discovered, think differently about bread than do housewives. Men make technical tests.

Women, wise in pleasing family appetites, decide almost solely on how bread tastes.

So this "woman's recipe" bread naturally turned out to be more exciting to taste... more delicate, tender.

We made another startling discovery!

In taste tests of loaves made from the same recipe, women always picked the freshest loaf. Our chemists looked into that. They found the reason.

When a loaf is hot from the oven, its tiny bread cells are tender, downy-soft. Chemists can measure this tenderness.

Moreover, in the fresh crumb are delicate flavor carriers. These are at their peak only while cell walls are springy—uncracked.
