Mislabeled Milk Warning Is Sent

Warning to Salem milk consumers that mislabeling of raw and pasteurized milk had been discovered here was issued yesterday by Dr. Vernon A. Douglas, county health officer. He urged that each consumer watch the labels to be certain the grade and type of milk ordered was being received. He also suggested that consumers desiring to ascertain what types of milk their dairymen were authorized to sell should telephone the health department, 3052, for this information.

Labeling of raw milk as pasteurized, discovered in the case of one small dairyman not equipped to pasteurize milk, is the most serious offense, Dr. Douglas said, because "pasteurized grand 'A' milk is the safest kind." He also had reports that pasteurized milk had been capped as raw milk.

"While we are certain mislabeling has taken place, we have not been able to get quite enough evidence to prosecute," Dr. Douglas added. "I think the trouble has been stopped by a severe reprimand but it would be best for consumers to watch their labels."
