Beneficial Moisture Over Wheat Region Causes Price Drop

Overseas Demand Declines But Grains Close Firm After Cent Drop

CHICAGO., Feb. 3-(AP)-Widespread beneficial moisture over the United States winter wheat zone went hand in hand today with material setbacks of prices.

Values began to slip in earnest when weakness developed at Kansas City, where, in addition to effects of the improved crop outlook, car-lot arrivals were larger than either a week or a year ago. Dearth of export business in Canadian wheat was a contributing bearish factor, with word of cheaper offerings at Liverpool from France and Portugal as well.

Stocks Reach Another High

Final Half-Hour of Rapid Buying Puts Some Up

to 5-Year Peaks NEW YORK, Feb. 3-(AP)-Optimistic traders touched spurs to

the stock market today in the final half-hour of dealings. Buying spread rapidly in an assortment of mining, steel and industrial specialty shares, but the move came too late to leave a broad imprint on the list as a whole, where declines slightly

outnumbered advances. Nevertheless, the Associated Press average of 60 stocks, up .5 of a point at 59.9, was at the best level since September 1, 1931, and there were numerous individual new tops for five years or longer.

Trading was in good volume toward the finish, but, during the early proceedings, business was restricted as Wall street awaited a decision on the TVA by the supreme court, which was not forthcoming. Total turnover in the stock exchange was 2,318,527 shares.

Gold Export Seen Some inflation thinking was

said to have been promoted by a further decline in the dollar in the foreign exchange market which allowed banking institutions to arrange the first gold exports to Europe since 1934.

The New York federal reserve bank announced that \$5,600,000 of the yellow metal had been withdrawn by banks for shipment

In the bond market, U. S. government obligations were a litthe monetary situation which was indicated by dollar rates in foreign exchange trading. With the exception of further buoyancy in low-priced rail loans, the corporate list was narrow.
