Issues Strike 5-Year Peaks

3 Million Shares Move; Industrials Center of Buying

NEW YORK, March 4 .- (AP)-Although sporadic bursts of profit taking shaded prices throughout the list in today's stock market, succeeding buying centered in industrial and miscellaneous shares sent many issues to the highest point in five years and extended the recent upward trend.

There were minor adjustments to bring prices in line with traders' interpretation of the Roosevelt taxation proposals. Steady pressure of buying and

selling sent total transactions to 3,011,250 shares compared with 2,750,910 shares on the pre-Allied Chemical Leads

Outstanding performer on the upside was Allied Chemical which added 8 1/2 points at 189 1/2. Others which advanced toward the average outside limit-some 3

points-included American Can at

128, International Harvester at

72, and Santa Fe at 77 1/2. Just before the close of the market, a surge of profit taking struck Chrysler, which lost all its gain piled up since the opening and went below the line for a loss of 2 points. It rallied to end with a major fractional decline at 99 %

European Experiments Are Being Tried Here, **Jackman Reports**

Farmers of both eastern and western Oregon are becoming increasingly interested in the production of special pasture strains of grasses and clovers developed in recent years by experimental workers in England, Wales and New Zealand, says E. R. Jackman, extension agronomist at Oregon State college. The development of these spe-

cial strains came as a result of a study of the performance and adaptability of different strains of the same crop. In developing these pasture
